PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Provided timely technical issue resolution for enterprise customers, utilizing available tools to investigate and troubleshoot complex problems across diverse operating systems and network configurations.
- Collaborated closely with engineering and account management teams to escalate and resolve customer-reported incidents, ensuring seamless product performance and customer satisfaction.
- Developed and documented comprehensive knowledge base articles and self-service solutions for recurring technical issues, reducing common support ticket volume by approximately 15%.
- Managed a dynamic workload to ensure all customer issues were resolved within defined service level agreements, prioritizing critical incidents and maintaining clear communication channels.
- Gained practical experience with **Linux**, **Windows**, and **macOS** environments through troubleshooting customer-reported issues, analyzing system logs, and identifying root causes.
- Assisted in the development of reusable self-service solutions for future incidents, contributing to a more efficient and scalable support infrastructure.
- Investigated and troubleshot technical issues related to **TCP/IP**, **DNS**, and **DHCP** protocols, diagnosing network connectivity problems for enterprise clients.

SKILLS

Operating Systems – Linux, Windows, macOS

Networking – TCP/IP, DNS, DHCP, VPNs, Firewalls, Routers, Switches

Troubleshooting – Problem-Solving, Incident Response, Root Cause Analysis

Scripting & Automation – Python, Bash, PowerShell

Cloud & Virtualization – AWS, Docker

Databases – PostgreSQL, MySQL, Oracle

Programming Languages – Java, Spring Boot, Python

PROJECTS

Enterprise Application Support Dashboard (HCL Technologies)

- Developed and maintained a **Java Spring Boot** application to aggregate operational data from monitoring tools like **Splunk** and **Dynatrace** for an enterprise client.
- Implemented automated data ingestion pipelines using **Python** and **SQL** to process logs and generate alerts for critical P1/P2 incidents, reducing manual analysis time by 30%.
- Designed and deployed the application on **AWS EC2** instances using **Jenkins** for CI/CD, ensuring high availability and performance for the financial-services operations dashboard.

Customer Issue Triage Automation (HCL Technologies)

- Created **Python** scripts to automate the initial triage of customer support tickets, categorizing issues based on keywords and system logs, improving initial response time by 20%.
- Integrated scripts with **Jira** to automatically assign tickets to appropriate support queues and populate custom fields, streamlining the incident management workflow.
- Developed basic reporting on ticket volume and resolution times using **SQL** queries against the Jira database for management review.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
