PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Resolved complex technical issues for enterprise customers by diagnosing and troubleshooting issues across distributed systems, ensuring timely resolution and maintaining high satisfaction.
- Managed customer interactions, meticulously recording investigation steps, troubleshooting procedures, and final resolutions within the support ticketing system.
- Collaborated closely with Cohesity engineering and account management teams to escalate complex cases, share customer feedback, and drive product improvements.
- Developed comprehensive self-service solutions and knowledge base articles based on recurring customer incidents, reducing future manual intervention by an estimated **15%**.
- Investigated and debugged technical challenges related to data security, cloud technologies, and storage systems, applying critical thinking to identify root causes.
- Automated repetitive support tasks using **Python** scripting, streamlining data extraction and analysis for incident reporting and reducing manual effort by approximately **10 hours per week**.
- Maintained and analyzed system logs from **Linux** servers using **Splunk** and **CloudWatch** to identify performance bottlenecks and security anomalies.

SKILLS

Operating Systems – Linux, Windows, macOS

Networking – TCP/IP, DNS, DHCP, VPNs, Firewalls, Routers, Switches

Scripting & Automation – Python, Bash, PowerShell

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Support Tools – Jira, Confluence, Splunk, Dynatrace

Development – Java, Spring Boot, REST APIs, Docker, Git, Jenkins

PROJECTS

Enterprise Data Protection System Diagnostics

- Developed **Python** scripts to parse and analyze log files from customer environments, identifying common failure patterns in data backup and recovery processes.
- Built a dashboard within **Jira** to track the lifecycle of critical customer support tickets, providing visibility into resolution times and team workload for an 8-person support team.
- Collaborated with senior engineers to document troubleshooting steps for complex network configuration issues, contributing to a knowledge base that reduced average resolution time for specific issues by **20%**.

Automated System Health Monitoring Framework

- Engineered a **Bash** scripting framework to monitor the health of enterprise applications deployed on **Linux** servers, automatically alerting on critical service failures.
- Integrated the monitoring script with **AWS CloudWatch** to push custom metrics and trigger alarms based on predefined thresholds, enhancing proactive issue detection.
- Created shell scripts to collect and aggregate performance data from multiple nodes, facilitating quicker root cause analysis for performance degradations.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
