PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed the end-to-end lifecycle of digital evidence, including **acquisition**, **preservation**, and **analysis** using approved forensic tools for **compliance investigations**.
- Operated and supported **digital evidence review platforms**, facilitating data ingestion, processing, filtering, and controlled production for electronic discovery activities.
- Provided **technical guidance** and support to investigative teams on digital forensics and eDiscovery matters, ensuring adherence to protocols and escalating complex issues.
- Prepared detailed, **evidential reports** outlining investigation methodologies, findings, and technical limitations to support compliance enforcement activities.
- Collaborated with investigative teams to integrate **digital forensic findings** into broader investigations, communicating technical details clearly to non-technical stakeholders.
- Maintained accurate **contemporaneous records** and **chain-of-custody information** for all digital evidence handled, ensuring a clear **audit trail** for legal defensibility.
- Contributed to the development and review of **secure evidence handling protocols** and utilized **enterprise platforms** like Microsoft and Google Cloud for data management.

SKILLS

Digital Forensics – Digital Evidence Handling, Evidence Acquisition, Evidence Preservation, Evidence Analysis, Chain of Custody, Audit Trail, eDiscovery Platforms, Forensic Tools, Technical Reporting

Technical Support – Technical Guidance, Investigative Support, Escalation Management, Compliance Investigations, Enforcement Activities

Platforms & Tools – Microsoft Platforms, Google Platforms, Digital Evidence Review Platforms, Approved Forensic Tools

Data Management – Data Ingestion, Data Processing, Data Filtering, Data Production, Secure Handling, Data Integrity

Methodology & Compliance – Industry Best Practices, Legal Requirements, Quality Assurance, Continuous Improvement, Protocol Adherence

PROJECTS

Digital Evidence Triage and Reporting System

- Developed a Python-based system to automate the initial triage of digital evidence, processing ~50 new cases per week and flagging critical data points for investigators.
- Integrated **logging mechanisms** that generated a detailed **audit trail** for all actions performed by the system, ensuring data integrity and compliance with forensic standards.
- Designed reporting templates within the system to standardize the output of findings, reducing average report generation time by **30%** for routine investigations.

Secure Digital Evidence Repository and Access Control

- Architected and implemented a secure repository using **AWS S3** for storing digital evidence, incorporating **access control policies** based on role and investigation.
- Managed the **chain-of-custody** for digital artifacts by implementing versioning and access logs for all data stored, ensuring a verifiable history of evidence handling.
- Configured **encryption at rest and in transit** for all stored evidence, meeting stringent security requirements for sensitive investigative data.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
