HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed and drove assigned project tasks for new medical device development, ensuring timely completion of project milestones by coordinating with cross-functional teams.
- Provided regular updates during project meetings, meticulously documenting minutes and action items for technical leadership and engineering teams.
- Contributed to the development and implementation of new processes and solutions that impacted department business metrics, focusing on product quality and safety standards.
- Assisted in interpreting data and organizing project activities within portions of new product development programs, ensuring alignment with clinical needs.
- Participated in creative problem-solving sessions to drive product excellence and process improvements within a medical device research and development context.
- Collaborated with SMEs and product managers to develop innovative medical devices aimed at improving patient care, translating clinical insights into engineering requirements.
- Containerized a Python-based data processing utility using **Docker** and deployed it to an **AWS EC2** instance, improving deployment consistency and reducing manual configuration errors.

SKILLS

Core Engineering – Analytical Skills, Critical Thinking, Technical Writing, Problem-Solving, Project Management, Process Improvement, Data Interpretation

AI/Data Concepts – Artificial Intelligence (AI), Data Concepts, Responsible AI Guidelines

Software Development – Python, Java, Spring Boot, REST APIs, SQL, Docker, Git, Jenkins

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, Data Modelling, Data Warehousing

Domain Knowledge – Medical Device Development, Clinical Needs, Safety Requirements, Quality Standards, Design History Files

PROJECTS

Medical Device Prototyping & Data Analysis

- Developed Python scripts to parse and analyze sensor data from a prototype medical device, identifying key performance indicators for user interaction.
- Built a **Power BI dashboard** to visualize sensor data trends and prototype performance metrics, enabling product managers to track early-stage development progress.
- Documented the data extraction and visualization process, contributing to the design history file for the new device prototype.

Automated Test Case Generation Framework

- Engineered a Python framework to automatically generate unit test cases for backend Java services, increasing code coverage by **18%**.
- Integrated the framework into the **Jenkins CI/CD pipeline**, ensuring that new code submissions triggered automated test generation and execution.
- Collaborated with senior engineers to define test case generation rules based on API specifications and business logic.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
