HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Contributed to the technical leadership of project components by defining and implementing **Java Spring Boot** microservices for new product features, ensuring alignment with clinical needs.
- Supported key design decisions for medical device software components, focusing on the **persistence layer** using **Hibernate** to meet stringent quality and safety standards.
- Developed and maintained **Java EE** application modules, incorporating **JUnit** tests and **Mockito** mocks to ensure code quality and adherence to design patterns.
- Collaborated within cross-functional teams to conduct **code reviews** and provide technical estimations for new feature development within Agile sprints.
- Assisted in the development and implementation of new processes and solutions impacting department business metrics, focusing on **design history file** creation and maintenance.
- Provided technical input on company intellectual property relevant to areas of work, supporting innovation and **IP generation** for novel medical device technologies.
- Containerized application components using **Docker** and deployed them to **AWS EC2** instances, managing configuration and basic resource allocation for predictable rollouts.

SKILLS

Programming Languages – Java, Python, SQL, R, English

Frameworks & Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Docker, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau, RStudio

Domain Knowledge – Medical Device Regulations, Quality Standards, Design History Files, Agile Methodologies

PROJECTS

Java-Based Medical Device Feature Development

- Developed core **Java Spring Boot** services to implement new functionalities for a medical device, focusing on user interaction and data processing.
- Implemented robust data persistence using **Hibernate** and **PostgreSQL**, ensuring data integrity and efficient retrieval for device operation logs.
- Wrote comprehensive **JUnit** test suites and performed peer code reviews to maintain high code quality and meet regulatory requirements for the medical device software.

Python-Automated Data Pipeline for Device Analytics

- Engineered **Python** scripts to automate the extraction, transformation, and loading (ETL) of device performance data from raw logs.
- Processed and analyzed large datasets using **pandas** and **NumPy**, identifying trends and anomalies for product improvement insights.
- Developed scheduled reporting mechanisms using **SQL** queries against a data warehouse, providing operational insights to the product development team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
