PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Analyzed daily and weekly sales reports to identify trends, bestsellers, and underperforming items, contributing to a **15% improvement** in stock turnover across key product lines.
- Updated spreadsheets and sales forecasts, incorporating new data points to refine projections for the upcoming **six weeks** of stock planning.
- Collaborated with the buying team to review product performance and plan stock levels, ensuring optimal availability for **over 50 product categories**.
- Assisted in distributing stock across **130+ stores** and the eCommerce platform, ensuring product availability aligned with sales forecasts.
- Monitored stock levels across multiple channels, identifying and flagging items for potential waste reduction initiatives, contributing to a **7% decrease** in overstock situations.
- Supported the creation of sales forecasts and budgets by providing data-driven insights on historical performance and market trends.
- Worked closely with buyers to track product performance against targets, suggesting actions such as promotions or markdowns to optimize sales and profit.

SKILLS

Retail Operations – Merchandising, Planning, Stock Management, Sales Analysis, Forecasting, Buying, Promotions, Markdowns, Retail Trends

Data Analysis & Reporting – Sales Reports, Trend Identification, Performance Tracking, Data Visualization, Reporting

Spreadsheets & Forecasting – Excel, Spreadsheet Management, Sales Forecasting, Budgeting

Core Competencies – Numeracy, Analytical Skills, Attention to Detail, Commercial Awareness, Communication, Teamwork

Technical Skills – SQL, Python, Power BI, Tableau, R, pandas, NumPy, scikit-learn, Excel

PROJECTS

Retail Sales Performance Dashboard

- Developed an interactive dashboard using **Power BI** to visualize daily and weekly sales data, identifying key trends and underperforming items for a retail analytics project.
- Implemented DAX measures to calculate sales growth, stock turnover rates, and profit margins, providing stakeholders with actionable insights.
- Connected to various data sources via **Power Query** to consolidate and transform data, ensuring a clean and reliable dataset for analysis.

Inventory Optimization Tool

- Built a Python script to analyze historical sales data and current stock levels, recommending optimal stock distribution across multiple retail locations.
- Integrated **SQL** queries to pull inventory data from a simulated database, enabling efficient data retrieval for the optimization logic.
- Developed logic to flag items with low turnover or high stock levels, supporting waste reduction efforts and improving inventory efficiency by an estimated **10%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
