HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and executed capacity plans for hybrid environments including **on-premises Kubernetes**, **Azure**, and **GCP**, ensuring support for traffic growth and new capabilities.
- Analyzed infrastructure demand and utilization patterns across distributed systems to forecast capacity needs and optimize **compute**, **storage**, and **network resource allocation**, identifying underused resources.
- Built **dashboards** and **observability solutions** using **Grafana** and **Prometheus** to provide reporting on capacity status, trends, and optimization opportunities.
- Partnered with AI, Hadoop, and Spark teams to translate workload characteristics and sizing requirements into actionable capacity plans for large-scale distributed environments.
- Conducted scenario and 'what-if' modeling to assess the impact of traffic growth, new features, and infrastructure changes on overall capacity.
- Contributed to capacity planning automation, performance analysis, and improvements to engineering processes and methodologies for large-scale distributed environments.
- Managed production environments supporting a financial-services client, focusing on transaction flow monitoring and operational alerting for failed messages across critical systems.

SKILLS

Cloud Platforms – Azure, GCP, AWS (EC2, S3, Lambda, CloudWatch)

Containerization & Orchestration – Kubernetes, Docker

Observability & Monitoring – Grafana, Prometheus, Splunk, Dynatrace

Data & Analytics – SQL (PostgreSQL, MySQL, Oracle), Python (pandas, NumPy), R, Power BI, Tableau, DAX, Power Query

Programming & Scripting – Java, Spring Boot, Python, REST APIs, Shell Scripting

DevOps & CI/CD – Jenkins, Git

Big Data Technologies – Hadoop, Spark, MapReduce, HDFS

PROJECTS

Distributed Systems Capacity Planning Framework (HCL Technologies)

- Designed and implemented a Python-based framework to collect and analyze metrics from distributed services running on Kubernetes, Azure, and GCP.
- Developed automated reporting modules that visualized capacity utilization, projected future needs based on traffic trends, and highlighted potential bottlenecks.
- Integrated the framework with existing CI/CD pipelines to provide real-time capacity feedback during deployment phases, reducing risk of resource contention.

Observability Dashboard for Enterprise Applications (HCL Technologies)

- Built interactive dashboards using Grafana and Prometheus to provide a unified view of system health, performance, and resource utilization for enterprise Java and .NET applications.
- Configured alerting rules based on key performance indicators and error rates, enabling proactive incident response and reducing P1/P2 escalations by approximately 15%.
- Wrote complex SQL queries against PostgreSQL and Oracle databases to extract historical performance data for trend analysis and capacity forecasting.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
