HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented distributed traffic management solutions using **Go** and **Kubernetes**, optimizing network protocols for enhanced system resilience.
- Developed high-performance applications in **C++** to manage eBay's public and private site traffic, contributing to platform stability.
- Strengthened platform observability by integrating **Prometheus** and **Grafana** for comprehensive monitoring of system health and traffic patterns.
- Collaborated with cross-functional teams to integrate networking solutions, identifying and resolving complex issues across systems.
- Contributed to open-source projects by developing new approaches to improve network capabilities, including exploration of new technologies.
- Led smaller projects focused on improving network infrastructure, sharing advanced engineering practices with team members.
- Containerized traffic management services using **Docker**, deploying and managing them within a **Kubernetes** orchestration framework.

SKILLS

Languages – C++, Go, Java, Python, SQL

Cloud & Orchestration – Kubernetes, Docker, AWS (EC2, S3, Lambda, CloudWatch)

Networking Protocols – TCP/IP, TCP, SSL, HTTP

Observability – Prometheus, Grafana, Splunk, Dynatrace

Development Methodologies – Agile, Scrum

Tools – Git, Jenkins, Jira, Confluence, Envoy

PROJECTS

High-Traffic Ingress Controller Development

- Engineered a high-performance ingress controller in **Go** to manage public site traffic for a large-scale platform, handling approximately 15,000 requests per second.
- Integrated **Envoy** as the proxy layer for advanced traffic control and routing configurations, improving request distribution efficiency by 18%.
- Deployed and managed the ingress controller within a **Kubernetes** cluster, ensuring resilience and scalability for critical services.

Distributed Systems Observability Enhancement

- Developed and deployed custom metrics exporters in **C++** for distributed services, feeding data into a centralized **Prometheus** monitoring system.
- Configured **Grafana** dashboards to visualize key performance indicators, traffic patterns, and error rates across multiple microservices, reducing incident detection time by 30%.
- Implemented log aggregation pipelines using **Splunk** to capture detailed system events, aiding in root cause analysis for production issues.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
