HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed, built, and maintained **Java** services for traffic management and routing, optimizing flow for eBay's commerce platforms.
- Improved system latency and throughput by profiling and performance tuning high-traffic **Java** applications, reducing average response times by **18%**.
- Executed root-cause analysis on production issues using **logs, metrics, and traces**, delivering reliability improvements to critical traffic systems.
- Deployed and troubleshot services running on **Kubernetes** across distributed environments, ensuring stable operation of traffic routing infrastructure.
- Collaborated with **SRE and platform teams** to integrate networking solutions, ensuring seamless traffic flow and adherence to security policies.
- Implemented secure service communication and routing controls using **TLS** and policy enforcement to enhance network security for traffic management.
- Containerized traffic management services using **Docker** and deployed them to a **Kubernetes** cluster, managing configurations and resource allocation.

SKILLS

Languages – Java, C++, Go, Python, SQL, R

Networking & Protocols – TCP/IP, HTTP/HTTPS, DNS, Load Balancing, TLS

Infrastructure & Orchestration – Kubernetes, Docker, AWS (EC2, S3, Lambda, CloudWatch), Linux

Observability & Monitoring – Prometheus, Grafana, ELK Stack, OpenTelemetry, Splunk, Dynatrace

Development Tools & Methodologies – Git, Jenkins, Jira, Confluence, Agile, Scrum

Databases – PostgreSQL, MySQL, Oracle

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

PROJECTS

High-Throughput Traffic Routing Service (HCL Technologies)

- Developed a **Java Spring Boot** microservice to manage and route high-volume network traffic, handling approximately **5,000 requests per second**.
- Implemented asynchronous processing patterns and connection pooling to minimize latency and maximize throughput for critical traffic flows.
- Integrated comprehensive logging and metrics collection using **Splunk** and custom dashboards to monitor service health and performance.

Kubernetes-based Service Deployment Automation

- Automated the deployment of backend services to a **Kubernetes** cluster using **Docker** and Helm charts, reducing deployment time by **40%**.
- Configured CI/CD pipelines in Jenkins to build, test, and deploy containerized applications, ensuring consistent and reliable releases.
- Wrote shell scripts to automate routine infrastructure tasks and log analysis on Linux servers.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
