PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Facilitated stakeholder workshops with business and technical teams to gather requirements for data strategy initiatives and system integrations, documenting needs for a new data asset register.
- Documented structured business and data requirements, process maps, and data flows for enhancements to enterprise systems, translating operational challenges into actionable user stories.
- Supported data audits and the development of an information asset register, identifying critical datasets, data owners, and associated quality issues across multiple internal systems.
- Defined data ownership, stewardship, quality validation, and access control requirements as part of a broader data governance framework implementation.
- Identified opportunities to improve workflows and automate manual processes by analysing existing operational procedures and proposing system integration enhancements.
- Prepared user acceptance testing (UAT) scenarios and supporting documentation for a new reporting dashboard, coordinating with business users for formal review and approval.
- Collaborated with technical teams to support change management activities, including user adoption strategies and knowledge transfer sessions for newly implemented data systems.

SKILLS

Business Analysis – Requirements Gathering, Stakeholder Management, Process Mapping, Data Modelling, Data Governance, Data Strategy, Systems Integration, Workflow Improvement, Reporting Improvement, Change Management, User Adoption, Knowledge Transfer, UAT

Data Management – Data Audits, Data Cataloguing, Information Asset Management, Data Ownership, Data Stewardship, Data Quality, Data Validation, Data Retention, Metadata Management

Tools & Technologies – Power BI, Power Platform, SQL, Microsoft 365, SharePoint, Jira, Confluence, Jenkins, Git

Programming & Scripting – Python, Java, SQL

Cloud & Infrastructure – AWS, Docker, Linux

PROJECTS

Enterprise Data Governance Framework Implementation

- Defined and documented data ownership, stewardship, and lifecycle management policies for critical business datasets, facilitating a central data asset register.
- Mapped current-state data flows and analysed data quality issues across integrated enterprise systems, identifying root causes for duplication and inconsistencies.
- Developed future-state process models and documented requirements for enhanced data validation rules and access control mechanisms to improve data integrity.

Business Intelligence Dashboard Enhancement

- Gathered requirements from business stakeholders for a new operational reporting dashboard, translating needs into functional specifications and user stories.
- Designed and built interactive dashboards using Power BI, incorporating DAX measures and Power Query for ETL to visualise key performance indicators.
- Coordinated user acceptance testing (UAT) with business teams and facilitated knowledge transfer sessions to ensure successful adoption of the new reporting solution.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
