PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained secure, scalable full-stack applications using **Java**, **Spring Boot**, and **React**, delivering new features across legacy and microservices architectures.
- Built and enhanced **APIs** and **microservices**, implementing robust error handling and asynchronous communication patterns with **Kafka**.
- Designed and implemented database solutions leveraging **PostgreSQL** and **Oracle**, including schema evolution and performance tuning for high-transaction volumes.
- Participated in **code reviews** and mentored junior engineers, ensuring adherence to coding standards and promoting knowledge sharing within the team.
- Collaborated with cross-functional teams in **Agile ceremonies**, contributing to technical estimations and sprint planning for complex software solutions.
- Owned feature development from design through testing, deployment, and **production support**, ensuring stability and reliability of business-critical applications.
- Containerised Java applications using **Docker** and deployed them to **AWS EC2** instances, managing infrastructure configurations and monitoring application performance.

SKILLS

Languages – Java, Python, SQL, JavaScript, TypeScript, R

Frameworks/Libraries – Spring Boot, Hibernate, JPA, React, Node.js, NestJS, scikit-learn, pandas, NumPy

Databases – PostgreSQL, Oracle, MySQL

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git

Tools/Other – Kafka, REST APIs, Agile, Scrum, Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau, DAX

PROJECTS

Enterprise Java Application Modernisation

- Modernised a core enterprise Java application by migrating from a monolithic architecture to a **Spring Boot**-based microservices framework, improving modularity and maintainability.
- Implemented **Hibernate** ORM for data persistence, optimising entity mappings and query strategies to reduce database load by approximately 18%.
- Developed RESTful APIs for inter-service communication, ensuring consistent data contracts and integrating with **PostgreSQL** for backend storage.

Real-time Transaction Processing Dashboard

- Developed a **Java Spring Boot** backend service to ingest and process high-volume transaction data streams from **Kafka** for real-time monitoring.
- Built a **React** frontend dashboard to visualise transaction statuses, alert on anomalies, and provide operational insights to business stakeholders.
- Integrated with **AWS Lambda** and **CloudWatch** for scalable processing and operational observability, handling an average of 2,500 events per second during peak loads.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
