PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed the incident lifecycle for critical enterprise systems, responding to P1/P2 incidents and adhering to strict SLAs within a production support environment.
- Developed Python scripts to automate data extraction, transformation, and loading processes for scheduled reporting and ETL tasks, improving data availability for operational teams.
- Executed ad-hoc SQL queries across PostgreSQL and Oracle databases for data validation, schema analysis, and supporting change management requests.
- Contributed to feature development and bug fixes for Java Spring Boot applications, including the design and implementation of REST APIs for inter-service communication.
- Participated in Agile/Scrum ceremonies, including sprint planning, daily stand-ups, and retrospectives, to facilitate efficient project delivery and continuous improvement.
- Containerized applications using Docker for consistent deployment across development and production environments, integrated into Jenkins CI/CD pipelines.
- Analyzed system logs and performance metrics using Splunk and Dynatrace to identify root causes of issues and proactively address potential service disruptions.

SKILLS

Languages – Java, Python, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux

Monitoring & Observability – Splunk, Dynatrace

Tools & Methodologies – Jira, Confluence, Agile, ITIL, Power BI, Tableau, DAX, Power Query

PROJECTS

Payments Operations Dashboard Enhancement

- Enhanced a Java Spring Boot-based payments operations dashboard by implementing new transaction monitoring features, improving visibility into payment flows.
- Developed Python scripts to ingest and process large volumes of transaction data from disparate sources, feeding into the dashboard's analytical capabilities.
- Wrote SQL queries to support data reconciliation workflows and validate the accuracy of reported transaction statuses, ensuring data integrity for operational reporting.

Enterprise Systems Integration Automation

- Automated routine change management tasks for enterprise ERP systems using Python scripting, reducing manual effort and potential for human error by approximately 40%.
- Designed and implemented REST APIs using Java Spring Boot to facilitate data exchange between the ERP system and other core business applications.
- Provided post-go-live support and coordinated User Acceptance Testing (UAT) for system configuration updates, ensuring smooth transitions and minimal disruption to business operations.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
