HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed IT/OT systems including VM infrastructure and user access controls within a high-regulation environment, ensuring security and compliant operations.
- Administered and maintained operational technology (OT) systems, focusing on security, continuity, and adherence to regulatory standards.
- Implemented and enforced user access policies and security protocols across diverse IT and OT environments.
- Supported and troubleshot enterprise applications using monitoring tools such as **Splunk** and **Dynatrace**, managing P1/P2 incidents to meet SLA targets.
- Automated data processing and reporting tasks using **Python scripting**, enhancing efficiency for scheduled reporting cycles.
- Developed and maintained **Java Spring Boot** REST APIs for cross-service data exchange, incorporating validation and circuit-breaker patterns.
- Containerized applications using **Docker** and deployed them to **AWS EC2** instances, managing CI/CD pipelines with **Jenkins**.

SKILLS

OT Security – OT systems management, User access control, Regulatory compliance, IT/OT integration

Infrastructure – VMware vSphere, AWS EC2, AWS S3, Docker

Networking – CCNA knowledge, TCP/IP, Network security

Monitoring & Support – Splunk, Dynatrace, CloudWatch, Incident response, SLA management

Development – Java Spring Boot, Python scripting, REST APIs, SQL

CI/CD – Jenkins, Git, Code reviews

PROJECTS

OT Systems Security Hardening Initiative

- Enhanced security posture of operational technology systems by implementing stringent access controls and network segmentation strategies.
- Deployed hardened virtual machine images for critical OT services, reducing the attack surface and ensuring compliance with industry regulations.
- Developed automated scripts in **Python** to monitor system logs for security anomalies and potential breaches across the OT environment.

Enterprise Application Monitoring & Automation

- Engineered automated data pipelines using **Python** and **SQL** to ingest and process operational data from multiple enterprise systems.
- Built custom dashboards in **Splunk** to visualize key performance indicators and alert on system health issues, improving incident detection time by **~20%**.
- Supported production Java applications by developing **REST APIs** for enhanced diagnostic data retrieval, aiding faster root cause analysis.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
