PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Installed and configured networking hardware, including routers, switches, and servers, across **multiple global customer sites** for large-scale network deployments.
- Troubleshot and resolved issues related to network cabling, including **copper termination and fibre optic testing**, ensuring adherence to industry standards.
- Performed rack and stack of networking hardware within data centre racks, adhering to specific build layouts and bills of materials for efficient space utilization.
- Conducted pre and post Wi-Fi surveys using industry-standard software and equipment to assess network coverage and performance for client deployments.
- Created detailed site survey reports for MDF and IDF readiness, assessing power, cooling, and rack status to inform network design and implementation plans.
- Provided technical support to network engineers and project managers through various communication channels, facilitating smooth project execution and problem resolution.
- Managed incident response for production systems, analyzing logs in **Splunk and Dynatrace** to identify root causes and restore service levels within defined SLAs.

SKILLS

Networking Hardware – Routers, Switches, Servers, PDUs, Copper Termination, Fibre Optic Cabling, Wi-Fi Surveys

Network Concepts – Network Design, Implementation, Problem Resolution, Technical Diagrams, Schematics, Port Maps

Site Operations – Rack and Stack, Site Surveys, MDF/IDF Readiness, Power & Cooling Assessment, Rack Status Reporting

Support & Communication – Technical Support, Interpersonal Skills, Time Management, Written and Oral Communication, Problem-Solving

Tools & Technologies – Splunk, Dynatrace, Linux Shell Scripting, Git, Jenkins, Jira, Confluence

PROJECTS

Data Centre Network Deployment Support

- Assisted network engineers in the deployment of networking hardware for a large-scale enterprise network, including rack and stack activities and cable management.
- Performed **copper and fibre optic line testing** to ensure compliance with data centre cabling standards and diagnose connectivity issues.
- Contributed to site readiness assessments by documenting power, cooling, and rack status, directly informing the deployment schedule for client infrastructure.

Production Systems Monitoring and Automation

- Developed Python scripts to automate data extraction and reporting for operational dashboards, reducing manual effort by approximately **30%**.
- Managed production support for enterprise Java applications, responding to P1/P2 incidents and performing log analysis using **Splunk** to meet strict SLAs.
- Executed SQL queries against **PostgreSQL** databases for data validation and ad-hoc reporting, supporting change management processes for system updates.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
