PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed the **availability**, **performance**, and **security** of critical enterprise applications, performing preventative maintenance and proactive system health checks to ensure adherence to SLAs.
- Resolved complex **incidents** and service requests within a 24x7 operational environment, maintaining high levels of customer satisfaction and business continuity through rapid root cause analysis.
- Supported application **releases**, patching cycles, and upgrades, coordinating change requests and participating in disaster recovery activities including periodic data center failover testing.
- Collaborated with internal stakeholders and external vendors to deliver end-to-end services, ensuring effective knowledge transfer into support teams for new application integrations.
- Identified and implemented **process improvements** and **automation opportunities** across the application landscape, reducing manual intervention in recurring operational tasks.
- Administered and supported both **Windows Server** and **Red Hat Enterprise Linux** environments, including log analysis, shell scripting, and cron job management for automated tasks.
- Participated in on-call rotations, providing out-of-hours support for critical business operations and ensuring timely resolution of urgent issues.

SKILLS

Core Technologies – Java, Spring Boot, Python, SQL, RHEL, Windows Server, Linux, Shell Scripting

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Monitoring & Support – Splunk, Dynatrace, Jira, Confluence, Incident Management, Change Control

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, pandas, NumPy, scikit-learn

Enterprise Systems – ERP Integration, Payments Operations Dashboard, Transaction Monitoring

Methodologies – Agile, Scrum

PROJECTS

Enterprise Application Monitoring and Health Checks

- Developed and maintained comprehensive monitoring dashboards using **Splunk** and **Dynatrace** to track application health and performance across a portfolio of enterprise Java and .NET applications.
- Automated routine system health checks and log analysis using **Python scripting**, reducing the time spent on daily operational tasks by approximately 30% and improving detection of potential issues.
- Managed incident response for P1/P2 issues, performing root cause analysis and implementing corrective actions to meet strict service level agreements (SLAs) for critical business systems.

Automated Reporting and Data Pipeline Enhancement

- Engineered **Python ETL pipelines** to extract, transform, and load data from PostgreSQL and Oracle databases into a central repository for scheduled reporting, processing approximately 1.5 million records weekly.
- Designed and built interactive **Power BI dashboards** to visualize key operational metrics and performance indicators for business stakeholders, enabling faster data-driven decision-making.
- Implemented database schema changes and optimized SQL queries in PostgreSQL and MySQL, improving data retrieval efficiency for critical financial services dashboard reporting.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
