PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed and updated the **Central Market Database (SAP ISU)** for enterprise participants, ensuring timely and accurate processing of market messages and adherence to service level agreements.
- Resolved customer, supplier, and staff queries and complaints regarding meter security and database operations, maintaining a high standard of service charter compliance.
- Documented and managed all reported **meter security issues**, including unauthorized interference and billing adjustments for damaged equipment and unrecorded usage.
- Developed **Python scripts** to automate data validation and reporting tasks for market message processing, reducing manual effort by approximately **30%**.
- Collaborated with cross-functional teams within Retail Market Services (RMS) and ESB Networks, including Meter Reading and Meter Operations, to facilitate seamless data flow and operational alignment.
- Performed **ad-hoc SQL queries** on PostgreSQL and Oracle databases to support data analysis for billing reconciliation and to investigate discrepancies in transaction flows.
- Containerized key data processing scripts using **Docker** for consistent deployment across development and production environments on AWS EC2 instances.

SKILLS

Database Management – SAP ISU, Central Market Database, PostgreSQL, Oracle, MySQL, SQL Querying, Database Updates, Data Validation, Schema Changes

Market Operations – Market Messages, Meter Security, Meter Reading, Meter Operations, Billing, Unrecorded Usage, Unauthorized Interference, Confidentiality

Software Development – Java Spring Boot, REST APIs, Python Scripting, ETL, Data Pipelines, Docker, Git, Jenkins

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Linux Shell Scripting

Business & Communication – Microsoft Word, Excel, PowerPoint, Communication Skills, Teamwork, Attention to Detail, Problem Solving, Customer Service, Agile/Scrum

PROJECTS

Market Data Processing & Reconciliation System (HCL Technologies)

- Developed a Python-based ETL pipeline to ingest and process market messages from various sources, handling approximately **5,000 messages daily** for a financial-services client's operations dashboard.
- Implemented automated data validation checks using SQL queries against PostgreSQL, identifying and flagging over **95% of data integrity issues** before they reached downstream systems.
- Created scheduled reports and alerts using Python and Splunk, providing operational teams with near real-time visibility into transaction flows and potential bottlenecks.

Enterprise System Integration & Support Automation (HCL Technologies)

- Automated routine production support tasks for enterprise Java and .NET applications using Python scripting, reducing the time spent on common incident triage by **40%**.
- Designed and implemented REST APIs using Java Spring Boot to facilitate data exchange between an ERP system and an internal operational platform, supporting critical business workflows.
- Managed change control processes for system configuration updates and coordinated User Acceptance Testing (UAT) across multiple interconnected enterprise systems.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
