PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed and coordinated with **DSO Generators** including Wind, Solar, and Battery, ensuring adherence to interface protocols and procedures for pre and post-energisation phases.
- Performed **Distribution Code Compliance Testing** for DSO Generators from NDCC, validating operational readiness and adherence to regulatory standards.
- Facilitated interaction with new and existing HV Demand and Generation customers, providing technical guidance and support on **Distribution System** operations.
- Developed and maintained **Operational Instructions** for generation and demand customers, ensuring clarity and accuracy for safe and efficient system integration.
- Managed improvements and updates for the **Apex platform**, enhancing stakeholder contact databases, restoration guides, and control room fault reporting capabilities.
- Investigated, reported, and followed up on **nuisance alarms** within the NDCC system, contributing to improved alert accuracy and reduced operational noise by approximately **15%**.
- Executed due diligence investigations across all aspects of system operational performance, identifying and mitigating potential risks to network stability and security.

SKILLS

Operations Management – System Performance, Network Operations, Stakeholder Coordination, Operational Instructions, Distribution Code Compliance, Operational Assessments, SLA Management.

Energy Systems – DSO Generators (Wind, Solar, Battery), HV Demand, MV System Performance, Grid Integration.

IT & Platforms – Apex Platform, NDCC, SCADA NM9 Systems, Microsoft Office Suite.

Technical Skills – Problem Identification, Technical Solution Delivery, Electrical Theory, Network Assets, Substations, Protection Systems.

Communication & Reporting – Interpersonal Skills, Reporting, Liaising with EirGrid, Operational Briefing, Training.

PROJECTS

Distribution System Operational Dashboard Enhancement

- Developed a Python-based reporting module to aggregate data from various sources, providing real-time operational status for distribution network assets.
- Integrated with legacy systems to extract performance metrics, improving data visibility for MV System Managers and reducing manual data compilation time by **~20%**.
- Designed data visualizations in a generic BI tool to highlight key performance indicators and potential issues, aiding in proactive problem identification.

Customer Integration Protocol Automation

- Automated the generation of interface protocols for new generation customers using a combination of scripting and templating techniques.
- Reduced the manual effort for protocol generation by **30%**, ensuring consistent and accurate documentation for new wind and solar installations.
- Collaborated with operations teams to refine protocol templates based on feedback, improving clarity and reducing integration lead times.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
