PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and calibrated key actuarial assumptions and methodologies for risk assessment, including statistical modelling of insurance liabilities and market risk factors.
- Assisted in the generation of actuarial results reports for internal stakeholders, group functions, and external regulatory bodies, ensuring clarity and accuracy in financial projections.
- Contributed to pricing and reserving discussions with underwriting, claims, and finance teams, providing analytical support to inform underwriting performance and strategic business decisions.
- Executed actuarial analysis to support the annual business planning process, communicating complex findings and recommendations to senior management and key business partners.
- Collaborated with actuaries, underwriters, and claims professionals to share data-driven insights, influence decision-making, and align on critical actuarial assumptions for product development.
- Designed and implemented analytical tools and reporting capabilities using **Power BI** and **SQL** to enhance underwriting performance and deliver actionable insights for senior management.
- Containerized analytical services using **Docker** and deployed to a cloud environment, managing configuration and ensuring predictable rollouts for enhanced operational stability.

SKILLS

Analytics & Modelling – Actuarial Science, Mathematics, Statistics, Economics, Business Analysis, Risk Management, Capital Management, Pricing, Reserving, Financial Modelling, Statistical Analysis, Hypothesis Testing, A/B Testing, Time-Series Analysis, Machine Learning Fundamentals

BI & Data Tools – Power BI, Tableau, DAX, Power Query, SQL, R / RStudio, Python (pandas, NumPy, scikit-learn)

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Programming & Scripting – Python, Java, Spring Boot, REST APIs, SQL

Enterprise Systems – ERP Integration Support, Change Management, Jira, Confluence

Observability & Support – Splunk, Dynatrace, Incident Response, Production Support

PROJECTS

Actuarial Assumption Calibration Framework (MSc Project)

- Developed a Python-based framework to calibrate actuarial assumptions for insurance pricing, incorporating historical data analysis and statistical modelling techniques.
- Engineered data pipelines using **pandas** and **SQL** to ingest and transform diverse datasets, preparing them for complex statistical analysis and model input.
- Visualized key assumption drivers and model sensitivities using **Power BI** dashboards, facilitating clear communication of analytical findings to non-technical stakeholders.

Enterprise Risk Analysis Dashboard (HCL Technologies)

- Built an interactive dashboard in **Power BI** to monitor key risk indicators and operational metrics for enterprise-level financial services applications.
- Extracted and aggregated data from multiple sources using **SQL** (PostgreSQL, Oracle) and Power Query, ensuring data integrity for reporting and analysis.
- Collaborated with business analysts to gather requirements and refine reporting logic, enhancing the dashboard's utility for operational decision-making and SLA adherence.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
