PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Provided high-touch technical support to strategic enterprise partners via phone, email, and chat, resolving an average of **15 partner inquiries** per day.
- Served as the primary point of contact for assigned enterprise-level partners, cultivating trust-based relationships and ensuring they fully utilized integrated software solutions.
- Developed deep expertise in Expedia Group's product suite, guiding partners through complex troubleshooting scenarios and offering tailored solutions to enhance their business operations.
- Gathered and analyzed partner feedback, identifying key pain points related to software integration and tool usage, which informed product improvement recommendations.
- Troubleshot and resolved tier-1 technical issues for integrated property management software, escalating complex tier-2 problems while maintaining ownership of partner communication throughout the resolution process.
- Collaborated with internal engineering and product teams to ensure timely resolution of partner escalations and to drive product and service enhancements based on field insights.
- Supported marketplace integrity by identifying potential policy violations and educating partners on best practices for managing their listings and accounts.

PROJECTS

Enterprise Partner Onboarding & Support Platform

- Designed and implemented a structured onboarding process for new enterprise partners using integrated property management software, reducing initial setup time by **20%**.
- Developed comprehensive support documentation and troubleshooting guides for common technical issues, improving first-contact resolution rates for partner inquiries by **15%**.
- Collaborated with internal product teams to integrate partner feedback loops, leading to the prioritization of three key feature enhancements in the following development cycle.

Technical Issue Triage & Resolution System

- Built a Python-based internal tool to help triage and categorize incoming technical support tickets, automating initial routing to specialized teams and reducing average response time by **18%**.
- Integrated the tool with existing ticketing systems (Jira) and basic data analysis libraries (pandas) to provide initial insights into common partner issues.
- Created standardized escalation protocols and communication templates for complex issues, ensuring consistent partner experience during issue resolution.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021
