PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Monitored a network of over **1,500 EV charging stations** and associated backend systems using NOC tools, identifying and responding to over **50 critical alerts** per week.
- Performed first-line troubleshooting for EV chargers, network connectivity issues, and software malfunctions, resolving approximately **85% of incidents** at the NOC level.
- Escalated complex technical issues to field service and engineering teams, providing detailed diagnostic information and coordinating resolution efforts to meet **strict SLAs**.
- Documented and tracked all incidents through a **ticketing system**, ensuring accurate logs for root cause analysis and generating daily reports on system performance and uptime trends.
- Coordinated routine health checks and preventive maintenance activities for charging infrastructure, contributing to a **98.5% availability target** for the network.
- Supported remote firmware updates and configuration changes for EV charging units, managing a backlog of over **200 update requests** per month.
- Analyzed network fundamentals and connectivity patterns to diagnose and resolve issues related to chargers, gateways, and cloud communication.

SKILLS

NOC Tools & Monitoring – NOC tools, Dashboards, CloudWatch, Splunk, Dynatrace

IT Support & Troubleshooting – First-line troubleshooting, Problem-solving, Incident response, Root cause analysis, Escalation management

Networking Fundamentals – Connectivity, Network protocols, TCP/IP

Systems & Infrastructure – EV charging stations, Backend systems, Linux, Shell scripting

Operations & Process – SLA management, KPI tracking, Ticketing systems, Documentation, Change management, Health checks

Communication & Soft Skills – Written communication, Verbal communication, Attention to detail, Organisational skills

PROJECTS

EV Charging Network Monitoring Dashboard (HCL Technologies)

- Developed and maintained a **Java Spring Boot application** to aggregate status and telemetry data from a simulated EV charging network of **~500 nodes**.
- Implemented real-time alerting mechanisms using **Spring Boot** and message queues to notify operations teams of charger faults and connectivity outages, reducing average detection time by **30%**.
- Designed REST APIs for data retrieval, supporting ad-hoc queries and reporting on charging station health and performance metrics.

Automated Network Health Check Script (HCL Technologies)

- Created a **Python** script to automate routine health checks across a fleet of **1,200 enterprise servers**, verifying service status, disk space, and network connectivity.
- Integrated the script with **Jenkins** for scheduled execution, reducing manual verification effort by approximately **15 hours per week** and improving detection of potential issues.
- Generated summary reports on system health, flagging servers with more than two critical alerts for immediate attention.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
