PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented secure cloud architectures in **AWS**, focusing on EC2, S3, and Lambda for production workloads.
- Built and maintained **protective and detective controls** across cloud environments to enhance threat visibility and response capabilities.
- Developed **detection engineering capabilities** using Python scripting to identify attacker behaviour and reduce time to detection, processing approximately 500 threat indicators daily.
- Led cloud security investigations and incident response activities, coordinating containment and remediation efforts across engineering teams.
- Built **automation scripts in Python** to improve the scalability and reliability of security controls, reducing manual intervention by **30%**.
- Partnered with infrastructure teams to embed security into **infrastructure-as-code workflows** and cloud platform configurations.
- Participated in a shared on-call rotation, responding to and coordinating efforts during security incidents within the Fin production environment.

SKILLS

Cloud Security – AWS, Cloud Security Principles, Detection Engineering, Incident Response, Cloud Security Controls, Threat Detection, Security Monitoring, AI-Assisted Detection.

Programming & Scripting – Python, Java, SQL, Bash.

Cloud Platforms & Technologies – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes.

Security Operations & Tooling – Splunk, Dynatrace, Jenkins, Jira, Confluence.

Networking & Infrastructure – Linux, Infrastructure-as-Code, CI/CD.

PROJECTS

Cloud Security Automation Framework (HCL Technologies)

- Developed a **Python-based framework** to automate the deployment and configuration of security controls across AWS environments, reducing manual setup time by **40%**.
- Integrated the framework with **Jenkins pipelines** to enforce security best practices during CI/CD processes for internal applications.
- Created automated alerts for security misconfigurations using **AWS CloudWatch**, flagging over **50 potential issues** in the first month.

Production Environment Security Hardening (HCL Technologies)

- Implemented security hardening measures for production Linux servers, including access control lists and secure configurations, reducing unauthorized access attempts by **60%**.
- Configured **Splunk dashboards** for real-time monitoring of security logs and system events, enabling faster identification of anomalous activities.
- Collaborated with operations teams to establish incident response playbooks for common security threats within the financial-services dashboard environment.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
