HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Embedded with strategic customers to understand their support workflows and data, identifying and implementing opportunities where **AI** could deliver measurable impact, leading to **3 new Fin deployments**.
- Partnered closely with Sales, Success, and Product teams to deliver seamless customer experiences and successful deployments, creating feedback loops that shaped product development for **AI agent features**.
- Drove adoption of **AI** by helping customers automate and scale their support operations, steering them toward best practices in measurement and **AI adoption** to realize the full value of Fin.
- Developed and deployed **Python** scripts for data ingestion and ETL processes, automating report generation and reducing manual effort by approximately **15 hours per week**.
- Designed and implemented **REST APIs** using **Java Spring Boot** to support cross-service data exchange, incorporating request validation and circuit-breaker patterns.
- Managed production support for enterprise applications using **Splunk** and **Dynatrace**, responding to P1/P2 incidents and ensuring adherence to strict SLAs.
- Containerized microservices using **Docker** and deployed them to an **AWS EKS** cluster, configuring Helm charts and basic resource limits for predictable rollouts.

SKILLS

AI/ML – AI, Machine Learning, LLM, Conversational AI, AI Agent, AI Models, Evaluation Metrics, Data Science

Programming Languages – Python, Java, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, FastAPI, Flask, NestJS

Cloud & DevOps – AWS, Docker, Kubernetes, Jenkins, Git, CI/CD, EKS

Databases – PostgreSQL, MySQL, Oracle

BI & Analytics Tools – Power BI, Tableau, DAX, Power Query

Other – REST APIs, Agile, Scrum, Linux, Splunk, Dynatrace

PROJECTS

Customer AI Agent Deployment Framework

- Developed a reusable framework in **Python** and **FastAPI** to accelerate the deployment of enterprise-grade **AI** agent solutions for strategic customers.
- Integrated the framework with customer data sources and existing support workflows, enabling automated data ingestion and response generation for **customer support** scenarios.
- Created comprehensive documentation and provided technical guidance to customer engineering teams, facilitating successful onboarding and adoption of the **AI** platform.

Real-Time Transaction Anomaly Detection Model

- Engineered a feature pipeline using **Python** and **SQL** to extract behavioural signals from a large volume of transaction data, processing approximately **1.5 million records**.
- Trained a **scikit-learn** classifier on the extracted features, tuning parameters to optimize for detecting rare fraudulent activities and achieving an **AUC of 0.88** on held-out data.
- Packaged the trained model behind a **FastAPI** inference endpoint, ensuring low latency and high throughput for real-time scoring of incoming transactions.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
