HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and deployed **Python** backend services and **REST APIs** using **FastAPI** to power AI agents, processing approximately **3,500 events/sec** during peak hours.
- Built and instrumented **AI agents** and **LLM-powered tools** for sales teams, including account research and call preparation, integrating with internal CRM data.
- Designed and implemented **data models** in **Snowflake** to support GTM analytics, enabling data-driven insights into customer product usage and sales pipeline performance.
- Owned the full lifecycle of AI tools from conception through production, including requirements gathering with sales leaders and iterative improvement based on user feedback and performance metrics.
- Implemented rigorous **evaluation sets** and regression tests for AI agent output, reducing incorrect responses by **22%** through targeted prompt engineering and data quality checks.
- Instrumented AI agent actions and user interactions using logging and tracing, enabling detailed analysis of failure points and quality breakdowns in agent decision-making.
- Containerized AI services using **Docker** and deployed them to a managed **Kubernetes** cluster on AWS, ensuring scalable and reliable operation.

SKILLS

Languages – Python, SQL, Java, R, TypeScript

Frameworks & Libraries – FastAPI, Spring Boot, pandas, NumPy, scikit-learn, LangChain, React

Databases – Snowflake, PostgreSQL, MySQL, Oracle

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git, Terraform

AI & ML – LLM, RAG, Vector Databases, Prompt Engineering, Model Evaluation, Machine Learning Fundamentals

BI & Data Analysis – Power BI, Tableau, DAX, Power Query, Data Modelling, ETL

Tools & Methodologies – Jira, Confluence, Agile, Scrum, REST APIs, GTM Systems

PROJECTS

AI-Powered Sales Intelligence Platform

- Developed Python backend services using FastAPI to serve AI models for sales call summarization and action item extraction, processing over **1,000 call transcripts** weekly.
- Designed and implemented a vector database for storing and querying customer interaction embeddings, enabling rapid retrieval of relevant historical data for sales reps.
- Integrated the platform with sales CRM data, providing context-aware insights and reducing manual research time for the sales team by an estimated **30%**.

Customer Onboarding Automation for ML Platform

- Built a Python-based CLI tool to automate the ingestion and validation of customer feature definitions for an internal ML platform, catching over **70%** of schema errors before training.
- Developed REST APIs using Flask to facilitate data flow between customer environments and the ML feature store, supporting seamless integration for pilot enterprise customers.
- Created comprehensive documentation and ran enablement sessions for two customer data teams, accelerating their time-to-first-feature from 4+ weeks to **10 days**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
