PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed daily payment processing and reconciliation activities for enterprise financial services clients, ensuring adherence to documented operational procedures.
- Investigated and resolved approximately **15-20 payment exceptions** per week, maintaining data integrity and compliance with internal standards.
- Identified and investigated suspected fraudulent transaction patterns, producing detailed reports for the compliance team and contributing to AML policy adherence.
- Developed Python scripts to automate the generation of **transaction monitoring reports**, reducing manual effort by an estimated **10 hours per week**.
- Collaborated with cross-functional teams including business analysts and operations staff to gather requirements and support User Acceptance Testing for system enhancements.
- Contributed to the enhancement of operational processes by identifying inefficiencies in transaction monitoring workflows and proposing procedural improvements.
- Containerized backend Java Spring Boot services using **Docker** for deployment to **AWS EC2** instances, improving deployment consistency.

SKILLS

Payment Processing – Payment processing, Transaction monitoring, Reconciliation, Fraud detection, AML policies

Core Technologies – Java, Spring Boot, Python, SQL, PostgreSQL, MySQL, Oracle, REST APIs

Cloud & DevOps – AWS, EC2, S3, Lambda, CloudWatch, Docker, Jenkins, Git

Analytics & BI – Power BI, Tableau, DAX, Power Query, Data modelling, Data warehousing, Splunk, Dynatrace

Methodologies – Agile, Scrum, Change management, Incident response, GDPR awareness

PROJECTS

Financial Services Transaction Monitoring Dashboard

- Developed and maintained a Java Spring Boot application that ingested and processed transaction data, providing real-time monitoring for a financial services client.
- Implemented automated alerting mechanisms within the dashboard to flag failed or stuck payment messages, reducing manual oversight time by approximately **30%**.
- Designed and executed SQL queries against PostgreSQL databases to perform data validation and support reconciliation workflows for operational teams.

Python ETL for Operational Reporting

- Engineered Python scripts to extract, transform, and load data from multiple sources into a data warehouse for generating operational reports.
- Automated the creation of daily and weekly reports on payment processing metrics, directly supporting the operations team's need for timely, fact-based decision-making.
- Applied data modelling techniques using pandas to structure and prepare data for visualisation in Power BI, enhancing report clarity for business stakeholders.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
