HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained automated API and integration tests for **microservices** using **Java** and **REST Assured**, ensuring functionality across cooperating services.
- Implemented automated test scripts for **backend services**, focusing on **asynchronous flows** and integrating them into **Jenkins CI/CD pipelines** for rapid feedback.
- Investigated and debugged test failures and production issues in **backend components**, contributing to root cause analysis and collaborating with development teams.
- Designed and executed test cases to validate software functionality and harden **AI-driven backend services**, ensuring quality as new features were implemented.
- Contributed to reliability and basic **performance testing** efforts, identifying and flagging quality gaps and risks in complex systems.
- Participated in **agile sprint planning** and technical estimation sessions, contributing to the team's ability to deliver the full landscape of testing.
- Managed and deployed containerized applications using **Docker** and orchestrated them on **AWS EKS**, configuring resources and ensuring predictable rollouts.

SKILLS

Languages – Java, TypeScript, Python, SQL

Testing Frameworks – REST Assured, Selenium WebDriver, Playwright

API & Concepts – REST APIs, HTTP, JSON, OAuth, JWT

CI/CD & Tools – Jenkins, GitHub, Jira, Docker, Kubernetes

Cloud & Databases – AWS, PostgreSQL, SQL

Methodologies – Agile, Microservices, Event-Driven Systems

PROJECTS

Automated API Testing for Microservices Platform

- Developed a comprehensive suite of automated API tests using **Java** and **REST Assured** to validate critical functionalities of interconnected backend services.
- Integrated test execution into **Jenkins CI/CD pipelines**, enabling daily automated regression testing and reducing the feedback loop for developers by approximately 40%.
- Authored detailed test reports and collaborated with cross-functional teams to triage and resolve identified defects, ensuring adherence to quality standards.

Reliability Testing for Event-Driven Backend

- Engineered Python scripts to simulate high-volume event streams and test the resilience of **asynchronous systems**, processing over 5,000 events per minute.
- Utilized **AWS CloudWatch** logs and **Splunk** for monitoring system behavior under load and identifying potential bottlenecks or failure points.
- Developed basic load testing scenarios to assess system stability and provide input for capacity planning discussions with the operations team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
