PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Defined and refined **quality assurance standards** and best practices for IT Service Management processes, providing guidance to partner teams to ensure consistent execution.
- Explored and implemented **automation opportunities** within ITSM processes, including automated incident resolution pathways and predictive analytics for problem management.
- Analyzed **service performance data** across the IT landscape, identifying trends and root causes to drive continual service improvement initiatives and reduce inefficiencies.
- Collaborated with the Service Management Lead to assess and refine **third-party service provider delivery**, ensuring alignment with performance expectations and contractual obligations.
- Drove the rationalization of ITSM processes by identifying and removing redundant steps and complexity, ensuring services remained fit-for-purpose and met evolving business needs.
- Acted as an internal consultant on **ITSM best practices**, working across IT teams to embed efficient service control processes and foster a culture of continuous improvement.
- Containerized **Java Spring Boot applications** used for internal tooling and deployed them to an AWS Elastic Kubernetes Service (EKS) cluster, establishing basic resource limits for predictable performance.

SKILLS

ITSM Processes – Incident Management, Problem Management, Change Management, Service Desk Operations, Continual Service Improvement

ITSM Tools – ServiceNow, Jira Service Management, BMC Helix ITSM

Automation & AI – AI-driven ITSM, Predictive Analytics, Automated Incident Resolution, Scripting (Python)

Cloud & DevOps – AWS, EKS, Docker, CI/CD, Jenkins

Methodologies – ITIL 4, Agile, DevOps

Programming Languages – Java, Python, SQL

Databases – PostgreSQL, MySQL, Oracle

PROJECTS

ITSM Process Automation with Python

- Developed Python scripts to automate the creation and categorization of incoming IT tickets from multiple sources, reducing manual entry time by approximately 40%.
- Implemented automated data extraction and reporting from ITSM tools using SQL and pandas to generate weekly performance summaries for service delivery teams.
- Integrated a basic natural language processing model to auto-tag incident descriptions, improving initial routing accuracy by 15% and speeding up triage.

ServiceNow Performance Dashboard Development

- Designed and built a series of interactive Power BI dashboards to visualize key ITSM performance indicators, including incident resolution times, ticket backlogs, and SLA compliance.
- Connected to ServiceNow APIs and PostgreSQL databases to extract and transform data using Power Query, creating a unified view of service operations for management review.
- Developed custom DAX measures to calculate complex metrics related to service efficiency and identify areas for process optimization across different IT support teams.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
