PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed the resolution of over 200 client inquiries weekly, ensuring adherence to project KPIs and maintaining absolute client data confidentiality within the ticketing system.
- Provided daily support and incident resolution for enterprise applications, focusing on SLA management and P1/P2 incident response across production environments.
- Developed Python scripts to automate data extraction and reporting tasks, reducing manual processing time by approximately **40%** for operational teams.
- Collaborated with cross-functional teams to gather project policy guidelines and translate them into actionable support procedures, enhancing team efficiency.
- Contributed to an 8-person team responsible for maintaining the operational integrity of a financial-services dashboard, focusing on transaction monitoring and alerting for failed messages.
- Performed root cause analysis for system defects and implemented timely fixes, ensuring minimal disruption to end-users and upholding data integrity.
- Containerized several Python-based ETL services using **Docker**, improving deployment consistency and facilitating smoother integration into the AWS cloud environment.

SKILLS

Client Support – Ticketing Systems, Client Inquiries, Service Delivery, KPI Adherence, Confidentiality, Client Focus

Core Technologies – Python, Java, Spring Boot, SQL, REST APIs, Linux, Git

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, CI/CD

Data Management – PostgreSQL, MySQL, Oracle, Data Validation, ETL, Data Pipelines

Operations & Monitoring – Splunk, Dynatrace, Incident Response, SLA Management, Change Management, Production Support

Analytics & BI – Power BI, Tableau, DAX, Power Query, Data Modelling, R, pandas, scikit-learn

PROJECTS

Automated Transaction Monitoring System

- Engineered Python scripts to parse and analyze transaction logs from a financial-services operations dashboard, identifying and flagging approximately **3,200** failed payment messages weekly.
- Developed data validation routines using **SQL** (PostgreSQL) to ensure the accuracy and completeness of transaction data before it was surfaced for reporting, catching ~15% of data anomalies at ingest.
- Integrated the Python processing pipeline with AWS Lambda and S3 for scalable data handling and automated alerting mechanisms, reducing manual oversight by **50%**.

Enterprise System Integration Support Tool

- Built a Python-based utility to automate data reconciliation checks between an ERP system and a client's operational database (Oracle), improving data consistency across interconnected systems.
- Designed and implemented REST API integrations using **Java Spring Boot** to facilitate data exchange between internal services and external enterprise platforms, supporting cross-system data flows.
- Documented the integration processes and provided **Jira**-based support for UAT coordination and post-go-live issue resolution for system configuration updates.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
