PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Acted as primary technical contact for three enterprise clients, gathering measurement product requirements and translating them into actionable implementation plans.
- Designed and executed incrementality and brand lift studies for key accounts, delivering insights that informed media spend allocation and improved campaign effectiveness by an average of **18%**.
- Developed Python scripts to automate data extraction and pre-processing for A/B tests, reducing manual effort by approximately **40%** and enabling faster iteration cycles.
- Performed deep-dive analysis on campaign performance data, identifying root causes for underperformance and recommending data-driven optimizations that increased conversion rates by **12%**.
- Collaborated with internal product and engineering teams to identify process gaps in measurement workflows, contributing to the design of new templated solutions for scaled client support.
- Managed and triaged technical issues for a portfolio of 50+ client accounts, diagnosing problems and coordinating resolution with specialized support teams to maintain service levels.
- Containerized data processing pipelines using **Docker** and deployed them to **AWS Lambda**, ensuring consistent execution environments and improving deployment reliability.

SKILLS

Measurement & Analytics – Measurement platforms, Attribution modeling, Statistical analysis, Incrementality, MMM, A/B testing, Brand lift studies

Data Analysis & SQL – SQL, Interpreting data, Identifying trends, Root cause analysis, Data-driven decisions, Data extraction, Data pre-processing

Programming & Scripting – Python, R, Shell scripting

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, CI/CD, Jenkins

Tools & Platforms – Google advertising platforms, Power BI, Tableau, Splunk, Dynatrace, Jira, Confluence

Methodologies – Agile, Scrum, Standard Operating Procedures (SOPs), Process improvement

PROJECTS

Client Measurement Strategy & Optimization Framework

- Developed a standardized framework for designing and executing measurement studies, including A/B tests and incrementality analyses, for enterprise clients.
- Built Python-based data pipelines to automate the aggregation and cleaning of campaign performance data, reducing analysis time for client reports by approximately **30%**.
- Presented findings and actionable recommendations from measurement studies to client stakeholders, contributing to an average uplift of **15%** in key performance indicators.

Automated Reporting for Financial Operations Dashboard

- Engineered Python scripts to automate the generation of daily operational reports from a financial-services dashboard, consolidating data from multiple SQL databases (**PostgreSQL**, **MySQL**).
- Implemented data validation checks within the Python scripts to ensure accuracy of reported metrics, reducing downstream reconciliation errors by over **20%**.
- Designed and deployed scheduled jobs on **AWS EC2** using cron, ensuring timely delivery of critical operational reports to business analysts and support teams.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
