PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed and administered the technical specification database for a fleet of approximately 1,400 aircraft leases, ensuring data accuracy for reporting and asset review systems.
- Input and maintained monthly aircraft utilization data and reviewed component status changes, contributing to the technical knowledge base for fleet management.
- Analyzed and updated shop visit events for aircraft components, ensuring timely and accurate record-keeping within the asset review system.
- Assisted with the MR Claims process by gathering and organizing relevant technical documentation and maintenance records.
- Developed Python scripts to automate data ingestion and validation for aircraft technical specifications, reducing manual entry errors by an estimated **15%**.
- Collaborated with aviation sector clients to gather requirements for technical data management, ensuring documentation updates met their specific needs.
- Maintained detailed technical records for a diverse fleet of aircraft types, ensuring up-to-date information on specifications and equipment data.

SKILLS

Aviation Domain – Aircraft lease management, Fleet technical records, Technical specification database, Aircraft maintenance reserve (MR) claims, Shop visit events, Aircraft technical information, Equipment data

Data Management & Analysis – Data migration management, Data analysis, Documentation updating and control, Database administration, Reporting

Software & Tools – Microsoft Excel, Microsoft Word, Microsoft Outlook, Python, SQL

Project & Process Management – Meet deadlines, Prioritization, Detail-Oriented, Organized, Diligent, Numerate

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Jenkins, Git

PROJECTS

Aircraft Lease Data Management System

- Designed and implemented a Python-based system to manage aircraft lease data, ingesting information from multiple sources including maintenance logs and financial records.
- Developed automated data validation checks using SQL queries against a PostgreSQL database, identifying and flagging approximately **30%** of data inconsistencies before system import.
- Created standardized reporting templates in Python for lease status, component life tracking, and utilization metrics, used by the internal operations team.

Technical Records Automation for Aviation Clients

- Built a series of Python scripts to parse and consolidate technical documentation for aircraft records, reducing manual processing time by **40%** for a pilot client.
- Developed a REST API using Flask to serve aircraft specification data, allowing for easier integration with client-facing asset management portals.
- Collaborated with client stakeholders to define data requirements and ensure the automated system met their operational needs for documentation control.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
