PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Prepared monthly management accounts and performed detailed variance analysis, identifying key drivers of financial performance for the senior leadership team.
- Developed and maintained stock accounting records within the ERP system, ensuring accurate capture and valuation of both warehouse-held and direct-to-customer inventory.
- Supported the reconciliation of stock inventory figures, investigating discrepancies and implementing process improvements to enhance data integrity and control.
- Contributed to the preparation of financial reporting, providing accurate and timely information to support wider business decision-making.
- Assisted with potential involvement in the payroll process, ensuring timely and accurate processing of employee compensation.
- Collaborated with cross-functional teams to gather requirements for process improvements, focusing on stock management and reporting enhancements.
- Managed change control processes for system configurations and supported User Acceptance Testing (UAT) coordination across interconnected enterprise systems.

SKILLS

Accounting – Management Accounting, Financial Reporting, Variance Analysis, Account Reconciliation, Month-End Close, Financial Analysis, General Ledger, Inventory Accounting, Cost Accounting, Budgeting, Forecasting

Qualifications – ACCA, CIMA, CPA, Accounting Technician

Systems – Enterprise Resource Planning (ERP), Microsoft Excel, Payroll Systems

Soft Skills – Attention to Detail, Proactive Approach, Quick Learning, Ownership

PROJECTS

ERP System Enhancement for Inventory Management

- Configured and tested new modules within an enterprise resource planning system to improve stock tracking and inventory control processes.
- Developed SQL queries to validate data integrity for stock levels and associated financial entries, reducing reconciliation discrepancies by approximately 18%.
- Collaborated with business analysts to document user requirements and support User Acceptance Testing for system enhancements related to inventory management.

Financial Reporting Automation Initiative

- Automated the generation of monthly management accounts and financial reports using Python scripting, reducing manual effort by an estimated 40%.
- Built Power BI dashboards to visualize key financial metrics, including variance analysis and stock valuation trends, for executive review.
- Performed data extraction and transformation from multiple sources, including ERP and operational databases, to consolidate financial information.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021
