PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Troubleshot and resolved **equipment issues** on advanced manufacturing lines, performing preventative maintenance and escalating complex problems to engineering teams to ensure consistent operational flow.
- Investigated and resolved **scrap and yield issues** by analysing equipment performance data and collaborating with Manufacturing Engineers to identify root causes and implement corrective actions.
- Recorded detailed **maintenance activities** in internal systems, managed handovers via Teams, and compiled yield updates using PowerPoint presentations for production teams.
- Utilised **SQL databases** to query equipment performance logs, analyse trends, and identify opportunities for process optimisation, directly contributing to improved operational efficiency.
- Collaborated effectively within a close-knit team of six Technicians and Production Core Teams across multiple key processes, ensuring seamless workflow and knowledge sharing.
- Executed all tasks with the highest regard for **safety standards and quality protocols**, adhering strictly to Good Manufacturing Practices (GMP) and regulatory requirements.
- Deployed containerised **Java Spring Boot** applications to AWS EC2 instances using Docker, managing CI/CD pipelines via Jenkins for automated testing and deployment.

SKILLS

Manufacturing Support – Process Improvement, Equipment Troubleshooting, Preventative Maintenance, Yield Management, Safety Protocols, Quality Assurance

Data Analysis & Tools – SQL, PowerPoint, Microsoft Teams, Excel

Software Engineering – Java, Spring Boot, REST APIs, Docker, AWS (EC2, S3, Lambda, CloudWatch), Jenkins, Git

Operating Systems – Linux, Shell Scripting

Databases – PostgreSQL, MySQL, Oracle

Troubleshooting & Support – Incident Response, Root Cause Analysis, Technical Escalation, Production Support

PROJECTS

Automated Equipment Performance Monitoring (HCL Technologies)

- Developed Python scripts to extract performance metrics from various **equipment logs** stored in PostgreSQL databases, automating data collection for trend analysis.
- Built automated alerts using **Splunk** to notify operations teams of critical equipment deviations, reducing manual monitoring effort by approximately 40% and enabling faster response times.
- Designed and implemented a system for tracking preventative maintenance schedules and completion rates, improving overall equipment uptime by an estimated **15%**.

Production Data Analysis Dashboard (MSc Data Analytics)

- Created interactive **Power BI dashboards** to visualise key production metrics, including yield rates, scrap analysis, and equipment downtime, for business stakeholders.
- Developed **DAX measures** and Power Query transformations to aggregate and analyse data from multiple sources, providing actionable insights into process bottlenecks.
- Presented findings and dashboard walkthroughs to project sponsors, facilitating data-informed decision-making for process improvement initiatives.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
