PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed end-to-end ticket resolution for L2 diagnostics, coordinating with field engineers for < 4-hour response times on critical hardware issues.
- Executed remote diagnostics and troubleshooting for Windows environments, identifying root causes for ~ 75% of reported user issues without escalation.
- Provided Tier 2 support for cash handling systems, analysing transaction logs and system alerts to resolve processing discrepancies.
- Developed Python scripts to automate routine reporting tasks for operations teams, reducing manual effort by approximately 8 hours per week.
- Performed system monitoring and analysis using **Splunk** and **Dynatrace** to ensure operational stability for enterprise applications.
- Contributed to change management processes by coordinating User Acceptance Testing (UAT) and providing post-go-live support for system updates.
- Assisted in documenting and updating knowledge base articles for common issues, improving first-contact resolution rates by an estimated 15%.

SKILLS

Operating Systems – Windows, Linux

Support Tools – Jira, Confluence, Splunk, Dynatrace, CloudWatch

Scripting & Automation – Python, Shell Scripting

Networking – Basic Networking Concepts

Databases – SQL (PostgreSQL, MySQL, Oracle)

Cloud Platforms – AWS (EC2, S3, Lambda)

PROJECTS

Automated L2 Diagnostics Reporting for Enterprise Systems

- Developed Python scripts to parse system logs and ticket data from **Jira** and **Splunk**, generating daily operational summaries.
- Implemented logic to identify recurring L2 issues and group them, providing actionable insights for the support team to target common problems.
- Reduced manual data aggregation time for incident reports by 60%, enabling faster root cause analysis.

Cash Handling System Transaction Analysis Tool

- Created a **Python**-based tool to analyse transaction flows within a financial operations dashboard, focusing on identifying failed or stalled messages.
- Integrated **SQL** queries to extract relevant data from PostgreSQL databases, allowing for detailed examination of payment processing workflows.
- Enabled operations teams to more efficiently triage and resolve ~30-40 transaction-related alerts per day.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
