PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed and interpreted corporate event content for equity markets and funds, ensuring accuracy and timeliness for a client's database.
- Collaborated with client support help desks to resolve escalated inquiries related to corporate actions data, providing timely and accurate responses.
- Applied problem-solving skills to identify and implement workflow efficiencies within the corporate actions process, enhancing overall operational effectiveness.
- Developed and maintained knowledge across various corporate events, including Cash Dividends and Rights Offerings, contributing to improved team coverage.
- Processed large volumes of data related to corporate events with high attention to detail, meeting tight deadlines for client deliverables.
- Contributed to cross-functional collaboration with client engineering and product development teams to support future product enhancements.
- Supported the production environment for a financial-services client by monitoring transaction flows and operational alerting for failed payment messages.

SKILLS

Core Competencies – Customer Orientation, Analytical Ability, High Impact Communication, Learning & Innovation

Languages – English, French

Financial Markets – Equity Markets, Corporate Events, Cash Dividends, Rights Offering, Spin-Offs, Meetings

Data Processing – Data Accuracy, Timeliness, Speed, Attention to Detail

PROJECTS

Corporate Event Data Enhancement (HCL Technologies)

- Enhanced the accuracy and timeliness of a corporate actions database by meticulously reviewing and validating incoming event disclosures from companies and exchanges.
- Developed a systematic approach for onboarding new corporate event types, expanding the database's coverage and utility for internal stakeholders.
- Collaborated with business analysts to define data quality metrics and reporting dashboards, providing insights into data integrity and coverage gaps.

Financial Operations Workflow Automation (HCL Technologies)

- Automated a reconciliation workflow using Python scripting, reducing manual processing time by approximately 40% and improving data consistency.
- Developed scheduled reports in Python to track key operational metrics for a payments dashboard, enabling proactive identification of transaction processing issues.
- Managed change control processes for configuration updates and system integrations within an enterprise ERP system, ensuring smooth post-go-live operations.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021
