PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Investigated high-risk accounts, documents, and transactions to identify fraud patterns such as fake identities and account takeovers, contributing to a **15% reduction** in successful fraudulent activities.
- Analyzed large datasets using **SQL** and **Excel** to detect fraud trends and anomalies, uncovering new patterns that informed **new detection rules**.
- Prepared detailed reports for leadership and customers on fraud incidents, findings, and recommended improvements, including **activity reports** for internal reviews.
- Worked closely with **Product and Engineering** teams to translate fraud investigation findings into actionable improvements for rules, tooling, and detection systems.
- Designed and scaled processes, workflows, and automation to maintain efficiency in risk operations, supporting a **30% increase** in customer application volume.
- Identified gaps in existing systems, policies, and detection strategies, proposing and delivering improvements to address emerging risks with stakeholders across the business.
- Managed **incident response** for critical fraud events, coordinating with operations teams to minimize impact and restore normal service levels within defined SLAs.

SKILLS

Data Analysis & Investigation – SQL, Excel, Google Workspace, Fraud Detection, Risk Operations, Transaction Monitoring, Pattern Analysis, Anomaly Detection, Reporting

Programming & Scripting – Python, Java, Spring Boot, SQL (PostgreSQL, MySQL, Oracle)

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux

DevOps & CI/CD – Jenkins, Git, Jira, Confluence

Data Visualization & BI – Power BI, Tableau, DAX, Power Query

Machine Learning & Analytics – scikit-learn, pandas, NumPy, R, Statistical Analysis

PROJECTS

Fraud Pattern Analysis and Reporting Tool (HCL Technologies)

- Developed a **Python** script to automate the extraction and aggregation of transaction data from PostgreSQL, reducing manual analysis time by **40%**.
- Engineered a reporting module that generated weekly insights on high-risk transactions and emerging fraud trends, which was adopted by the financial-services client's operations team.
- Integrated **Power BI** to visualize key fraud metrics and patterns, enabling stakeholders to quickly understand risk exposure and make data-informed decisions.

Customer Risk Monitoring Dashboard (HCL Technologies)

- Built and maintained a Java Spring Boot application that ingested transaction data to monitor operational health and identify anomalies for a financial-services client.
- Implemented alert mechanisms within the dashboard to flag failed or stuck payment messages, enabling faster incident response and reducing average resolution time by **~20%**.
- Collaborated with business analysts to refine alert thresholds and reporting requirements, ensuring the dashboard met operational and regulatory awareness needs.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
