HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and validated analytic datasets from raw **claims**, **EHR**, and **lab data**, performing data checks and cleaning for observational studies.
- Constructed patient cohorts and defined key variables for longitudinal analyses, aligning with specific study objectives in oncology research.
- Collaborated with epidemiologists to define specifications for descriptive and complex statistics, including **survival analysis** and **regression models**, for RWD studies.
- Executed and quality-controlled **TFLs** (Tables, Figures, Listings) for protocols, reports, and manuscripts, leveraging secondary real-world data sources.
- Supported the development of study documents such as protocols and statistical analysis plans, ensuring adherence to client best practices and methodologies.
- Provided technical and statistical programming expertise, independently resolving complex analytical challenges for multiple concurrent studies.
- Managed and prioritized multiple tasks and projects simultaneously, delivering results to project teams and key stakeholders within defined timelines.

SKILLS

Programming Languages – R, Python, SQL

Data Sources – Claims Data, EHR Data, Lab Data, PharMetrics Plus, Flatiron, Tempus

Statistical Methods – Longitudinal Analysis, Survival Analysis, Regression Models, Censor Data Handling, Confounding, Missing Data Imputation

Therapeutic Area – Oncology

Research Areas – Real-World Evidence (RWE), Observational Research, Safety Analyses

Tools & Technologies – Biostatistics, Epidemiology, Data Science, SAS (implied from programming context)

PROJECTS

Oncology Patient Cohort Analysis Platform

- Developed a Python-based data processing pipeline to ingest and standardize **EHR** and **claims data** for patient cohort identification.
- Implemented **SQL** queries to extract and validate patient demographics, diagnosis codes, and treatment histories for observational oncology studies.
- Designed and executed analytical routines for cohort feasibility assessment and variable definition, supporting epidemiologist specifications for RWD analysis.

RWD Safety Analysis Framework

- Engineered an R package for conducting safety analyses on real-world data, incorporating methods for handling **censor data** and missing values.
- Developed reusable **R** functions for generating descriptive statistics and visualizations of adverse event profiles from **claims** and **EHR** datasets.
- Performed quality control on analytical outputs and contributed to the generation of statistical tables and listings for study reports.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
