PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **Python** feature pipelines on **AWS Lambda** and **S3** to power downstream ML scoring, handling approximately 3,500 events per second during peak hours.
- Developed and deployed **Java Spring Boot** REST APIs for cross-service data exchange, incorporating request validation and circuit-breaker patterns for enhanced resilience.
- Managed the full data science lifecycle for an internal anti-abuse workflow, from requirements gathering and parameter engineering through to technical presentation of results.
- Containerized data science services using **Docker** and deployed them to an **AWS EKS** cluster, configuring **Helm** charts and resource limits for predictable deployments.
- Collaborated with cross-functional teams including data engineering and product managers to design, test, and build core algorithms for commercial AI products.
- Acted as primary technical contact during onboarding for three enterprise customers, translating their feature pipeline requirements into actionable **Python** implementations.
- Engineered feature extraction logic in **Python** and **SQL** to generate behavioural signals from a transaction log of approximately 1.1 million records for model training.

SKILLS

Core Technologies – Python, Java, SQL, Spring Boot, REST APIs, Docker, Linux, Git, Jenkins, Jira, Confluence, AWS, PostgreSQL, MySQL, Oracle, Splunk, Dynatrace, pandas, numpy, scikit-learn, Flask, FastAPI

AI/ML & Data Science – Machine Learning Algorithms, Clustering, Regression, Neural Networks, Decision Trees, Time Series, Ensemble Methods, LLM, RAG, Prompt Engineering, Data Modelling, Statistical Analysis, A/B Testing, Time-Series Analysis, Data Warehousing, ETL

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Azure, Azure DevOps, Kubernetes, Helm, CI/CD, Git, Version Control, Automated Testing

Data Visualisation & BI – Power BI, Tableau, DAX, Power Query, Data Visualisation

Big Data Technologies – PySpark, Databricks, Hadoop, Spark Concepts

Agile & Collaboration – Agile Methodologies, Scrum Ceremonies, Cross-functional Collaboration, Requirements Gathering, Technical Presentation

PROJECTS

Production ML Model for Transaction Analysis (HCL Technologies)

- Engineered a feature pipeline in **Python** and **SQL** to extract behavioural signals (velocity, geo-distance, device-fingerprint) from a transaction log of roughly 1.1 million records.
- Trained a **LightGBM classifier** on the resulting features, tuning class weights to handle a 1:140 fraud imbalance and achieving approximately **0.91 AUC** / **0.46 F1** on a held-out month.
- Packaged the model behind a **FastAPI** inference endpoint with input validation, achieving p95 latency around 180ms, and implementing basic feature-drift logging.

Customer Onboarding Playbook for ML Feature Store (HCL Technologies)

- Worked directly with two pilot enterprise customers to design and ship a guided onboarding flow for an internal ML feature store, including SDK examples and debug tooling.
- Built a **Python CLI** to validate customer feature definitions against the platform schema before submission, catching approximately **70%** of schema errors at write time.
- Documented common integration patterns and ran two follow-up workshops with customer data teams to upskill their internal engineers on the ML platform.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
