PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Translated business requirements for a global banking group into detailed technical specifications for API integrations, ensuring alignment with regulatory and technical standards.
- Gathered and analyzed complex business and regulatory requirements for **Open Banking** APIs, translating them into actionable user stories for development teams.
- Collaborated with architects and developers to design and document **REST API** endpoints, including request/response schemas and authentication flows using **OAuth2** and **OpenAPI** specifications.
- Supported API testing initiatives by developing automated test cases in **Postman** to validate integration points and ensure data accuracy against business rules.
- Worked with compliance teams and external partners to ensure new and existing digital banking solutions met internal governance, audit, and regulatory requirements, including **GDPR**.
- Facilitated UAT sessions and post-implementation triage for new payment processing features, bridging communication between business stakeholders and the development team.
- Containerized backend services using **Docker** and managed deployments on **AWS EC2** instances, improving application portability and simplifying release cycles.

SKILLS

API Technologies – REST, JSON, OAuth2, OpenAPI Specifications

Financial Services Domain – Banking Solutions, Cash Management, Corporate Clients, Regulatory Requirements, Audit Trails, GDPR

Business Analysis – Requirements Gathering, Technical Specifications, Stakeholder Management, UAT Support, Process Analysis

Development Tools – Postman, SoapUI, JMeter, Git, Jira, Confluence

Cloud & Containerization – AWS (EC2, S3, Lambda, CloudWatch), Docker

Programming Languages – Java, Spring Boot, Python, SQL

PROJECTS

API Integration for Payments Dashboard

- Designed and implemented RESTful APIs using **Java Spring Boot** to connect a legacy payments operations dashboard with new external partner systems.
- Developed comprehensive API documentation and integration guides for business analysts and external partners, clarifying data flows and error handling mechanisms.
- Wrote Python scripts to automate the validation of API payloads against predefined schemas, reducing integration errors by approximately **20%** during testing phases.

Digital Banking Solution Requirements Analysis

- Analyzed and documented functional and non-functional requirements for a new suite of digital banking APIs, focusing on corporate client needs and **regulatory standards**.
- Collaborated with business stakeholders and compliance officers to define acceptance criteria for **Open Banking** features, ensuring adherence to internal governance.
- Created detailed user stories and process flows in Jira to guide the development team in building secure and scalable banking solutions.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
