PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** REST APIs for cross-service data exchange, incorporating request validation and circuit-breaker patterns to ensure reliable communication between distributed systems.
- Developed and maintained **Hibernate** / JPA entities and queries to manage relational data persistence for enterprise applications, ensuring data integrity across complex schemas.
- Authored **JUnit** and **Mockito** tests for Java components, achieving over **85% code coverage** for critical business logic modules and reducing post-deployment defects.
- Supported the configuration and monitoring of **manufacturing layout** and **process changes** for operational engineering projects, ensuring adherence to technical quality and schedule requirements.
- Assisted in the preparation and evaluation of **equipment set-ups** and **corrective actions**, contributing to the optimization of manufacturing processes and overall production efficiency.
- Coordinated and tracked the effectiveness of **corrective/proactive action efforts** in response to internal and customer-reported discrepancies, improving issue resolution timelines by approximately **15%**.
- Containerized multiple Java applications using **Docker** and deployed them to an **AWS EC2** environment, establishing basic CI/CD pipelines with **Jenkins** for automated builds and deployments.

SKILLS

Languages – Java, Python, SQL, R, Bash

Frameworks/Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux

Databases – PostgreSQL, MySQL, Oracle

Tools/Platforms – Splunk, Dynatrace, Jira, Confluence, Power BI, Tableau

Methodologies – Agile, Scrum, CI/CD, Root Cause Analysis, Trend Analysis

PROJECTS

Enterprise Java Application Support and Enhancement

- Provided production support for a suite of **Java** enterprise applications, diagnosing and resolving P1/P2 incidents using **Splunk** and **Dynatrace**, maintaining service level agreements for core business functions.
- Implemented new features and bug fixes in **Java Spring Boot** microservices, focusing on improving API performance and integrating with downstream systems via REST.
- Managed database schema changes and performed data validation queries in **PostgreSQL** and **MySQL** environments to support application updates and ensure data consistency.

Manufacturing Process Optimization Dashboard

- Developed a **Power BI** dashboard to visualize key manufacturing metrics, including equipment uptime, process yields, and corrective action status, providing actionable insights to operational engineering teams.
- Engineered **Python** scripts to automate data extraction and transformation from disparate sources, preparing datasets for analysis and reporting within the dashboard.
- Collaborated with operations stakeholders to gather requirements for the dashboard, ensuring it effectively supported **trend analysis** and continuous improvement initiatives.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
