HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Monitored and analyzed **moulded component data trends** and capability issues, identifying root causes for production variances within a regulated manufacturing environment.
- Prepared and communicated **quality performance data** to internal teams and external suppliers, providing clear recommendations based on trend analysis to drive improvement actions.
- Supported external suppliers in analyzing quality issues, tracking the implementation of agreed-upon corrective actions, and verifying their effectiveness.
- Collaborated with internal teams to analyze and resolve identified quality issues, contributing to cross-functional problem-solving initiatives.
- Managed and reported on **Bought-In-Component (BIC) data trends** and capability metrics, ensuring adherence to strict quality management system requirements and data integrity principles.
- Participated in **Lean Manufacturing and continuous improvement** activities, coaching team members in problem-solving and driving adoption of new quality initiatives.
- Deployed containerized Python data analysis scripts for automated quality reporting to a **Kubernetes cluster** on AWS, ensuring consistent and timely delivery of insights.

SKILLS

Data Analysis Tools – Predisys, Power BI, Tableau, R/RStudio, pandas, NumPy, scikit-learn

Programming Languages – Python, Java, SQL

Cloud & Containerization – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes

Development Practices – Agile/Scrum, CI/CD, Jenkins, Git, Code Reviews

Database Technologies – PostgreSQL, MySQL, Oracle

Monitoring & Observability – Splunk, Dynatrace

Domain Knowledge – SPC, Quality Management Systems, Lean Manufacturing, Data Integrity, Regulatory Compliance

PROJECTS

Supplier Quality Data Analytics Platform (HCL Technologies)

- Developed automated Python scripts to ingest and process supplier quality data from multiple sources, transforming raw inputs into structured datasets for analysis.
- Built interactive **Power BI dashboards** to visualize key performance indicators (KPIs) for supplier quality, including defect rates, lead times, and compliance adherence, enabling stakeholders to quickly identify trends.
- Implemented data validation checks using **SQL queries** against PostgreSQL to ensure the accuracy and integrity of quality metrics reported to management and external partners.

Component Performance Monitoring System (HCL Technologies)

- Engineered a system using **Java Spring Boot** to monitor component performance data, integrating with an internal messaging queue to process real-time status updates.
- Developed REST APIs to expose performance metrics, facilitating integration with an enterprise-wide operations dashboard and providing data for trend analysis.
- Containerized the monitoring service with **Docker** and deployed it to an AWS EC2 instance, ensuring high availability and scalability for processing component data streams.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
