PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Translated complex business needs into **user stories** and acceptance criteria for the tax engine, clarifying product logic and eliminating ambiguity for development teams.
- Analyzed **third-party APIs** and mapped intricate data flows to define integration requirements and support the design of scalable product architectures.
- Collaborated with Product Managers and engineers to shape merchant-facing features, focusing on **tax registration**, calculation, nexus monitoring, and filing workflows.
- Investigated complex business scenarios related to international tax compliance, ensuring clear product specifications for features covering the US, Canada, and Europe.
- Maintained structured documentation for product requirements, system behavior, and business logic, supporting continuous improvement of existing processes.
- Participated in **Agile ceremonies** and sprint planning, contributing to technical estimations and ensuring alignment between product vision and engineering execution.
- Managed production support for enterprise applications using **Splunk** and **Dynatrace**, responding to P1/P2 incidents and adhering to strict SLAs.

SKILLS

Business Analysis – Requirements Gathering, User Stories, Acceptance Criteria, Process Mapping, Documentation, UAT Support, Product Discovery

APIs & Integrations – REST APIs, JSON, Third-Party API Analysis, System Interactions, Data Flow Mapping

Core Technologies – SQL, Jira, Confluence, Linux Shell Scripting, Git

Fintech Domain – Tax Engine, Tax Registration, Tax Calculation, Nexus Monitoring, Tax Filing, Remittance, VAT, Sales Tax

Methodologies – Agile, Scrum, Software Development Life Cycle (SDLC)

PROJECTS

Tax Engine Requirements Specification

- Defined detailed product requirements and acceptance criteria for a global tax compliance engine, focusing on simplifying processes for internet businesses.
- Mapped data flows and analyzed system interactions for key modules including tax registration, calculation, and nexus monitoring across multiple jurisdictions.
- Collaborated with engineering and finance teams to clarify product logic and ensure comprehensive coverage of complex business scenarios before development.

API Integration Analysis for Financial Services Platform

- Analyzed the structure and functionality of **third-party APIs** to identify integration points for a financial services dashboard.
- Documented data mapping requirements and system interaction protocols, facilitating seamless data exchange between internal and external systems.
- Supported cross-functional teams in understanding integration capabilities and potential edge cases for enhanced operational workflows.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
