## PROFESSIONAL EXPERIENCE — 3.5 YEARS

**Software Engineer — HCL Technologies, Chennai, India** Sep 2021 – Jan 2025

- Analyzed customer acquisition channels and cohorts to assess conversion rates and customer lifetime value (LTV) for subscription-based SaaS products, identifying high-profit segments for Marketing teams.
- Investigated conversion funnels and user engagement patterns across the customer journey, from initial website visit to subscription renewal, uncovering friction points that impacted retention rates.
- Monitored payment performance metrics, including transaction acceptance rates and declined payment reasons across various payment service providers and customer segments.
- Collaborated with Data Science specialists to evaluate the impact of product and marketing initiatives through deeper analysis and experiment measurement.
- Translated complex business questions from Product and Finance departments into structured, reliable data analyses using advanced SQL queries.
- Developed and maintained reusable data analysis tools and workflows, empowering internal teams to independently explore data and answer critical business questions.
- Integrated AI-powered assistants into daily analytical workflows to enhance the efficiency and quality of data exploration and reporting processes.

## SKILLS

**Analytics & BI Tools** – Power BI, Tableau, DAX, Power Query

**Data Analysis & Statistics** – SQL, Python (pandas, NumPy, scikit-learn), R / RStudio, Statistical Methods, Exploratory Data Analysis, A/B Testing, Cohort Analysis, Time-Series Analysis

**SaaS Business Metrics** – CAC, LTV, ARPA, Conversion Rates, Retention, Churn

**Data Engineering & Warehousing** – Data Warehousing, ETL, Data Modelling

**Cloud & Infrastructure** – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux

**Programming & Backend** – Python, Java, Spring Boot, REST APIs, Flask, FastAPI

**Methodologies & Tools** – Agile/Scrum, Jira, Confluence, Git, Jenkins

## PROJECTS

### SaaS Customer Journey Analytics Dashboard

- Developed an interactive Power BI dashboard to visualize the end-to-end customer journey for multiple SaaS products, tracking key metrics from acquisition to retention.
- Implemented DAX measures to calculate LTV, CAC, and conversion rates across different customer cohorts, providing actionable insights for marketing and product teams.
- Integrated Power Query to ETL data from various sources, ensuring data consistency and reliability for reporting on user engagement and subscription performance.

### Payment Performance Monitoring System

- Built a Python-based system to ingest and analyze payment transaction data, focusing on identifying patterns in declined payments and success rates across different PSPs.
- Wrote SQL queries against PostgreSQL to segment transaction data by country and customer type, facilitating targeted analysis of revenue risk indicators.
- Created automated reports summarizing payment acceptance rates and retry mechanism effectiveness, supporting the Payments team in process improvement initiatives.

## EDUCATION

**M.Sc. Data Analytics — National College of Ireland, Dublin** Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India** 2021

## CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
