PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented experimentation frameworks for SaaS products, enabling teams to formulate hypotheses, select metrics, and calculate statistical power for A/B tests.
- Analyzed complex datasets throughout the customer journey, including acquisition, usage, and payment performance, to identify key growth opportunities and revenue drivers.
- Investigated conversion funnels and user behavior patterns to identify friction points, developing actionable hypotheses for product improvement experiments.
- Collaborated with Payment teams to analyze transaction performance, investigate payment success rates, and design experiments aimed at improving key payment metrics.
- Evaluated customer lifetime value (LTV) and customer acquisition cost (CAC) across various segments and channels, informing strategic marketing investments and business decisions.
- Translated business and leadership questions into analytical approaches, statistical analyses, and experimentation protocols, ensuring alignment with strategic objectives.
- Developed and presented analytical findings, statistical uncertainties, and actionable recommendations to both technical and non-technical stakeholders, facilitating data-informed decision-making.

SKILLS

Data Science & Experimentation – A/B testing, Hypothesis testing, Statistical power calculation, Cohort analysis, Customer Lifetime Value (LTV), Customer Acquisition Cost (CAC), Product analytics, Regression analysis, Time-series analysis, Machine learning fundamentals

Programming & Data Analysis – Python, SQL, pandas, NumPy, scikit-learn, R, RStudio

Cloud & Data Platforms – AWS (EC2, S3, Lambda, CloudWatch), Data warehouses, Product analytics platforms

BI & Visualization – Power BI, Tableau, DAX, Power Query, Data modeling

Backend & Systems – Java, Spring Boot, REST APIs, PostgreSQL, MySQL, Oracle, Docker, Linux

PROJECTS

SaaS Product Experimentation Framework Development

- Designed and implemented a comprehensive experimentation framework for SaaS products, covering hypothesis formulation, metric selection, and statistical validation.
- Developed Python scripts to automate the analysis of A/B test results, providing clear insights into product performance changes and statistical significance.
- Collaborated with product managers to define key performance indicators (KPIs) and success metrics for new feature rollouts, ensuring measurable outcomes.

Customer Behavior Analysis for SaaS Growth

- Built interactive Power BI dashboards to visualize customer journey data, acquisition funnels, and retention cohorts for a financial-services client.
- Performed exploratory data analysis using Python (pandas, NumPy) on large datasets to identify user behavior patterns and potential friction points.
- Wrote SQL queries against PostgreSQL and Oracle databases to extract and aggregate data for customer segmentation and LTV analysis.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
