PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and deployed enterprise storage architectures, integrating **Dell PowerStore** and **NetApp** arrays with **SAN fabrics** to meet specific business and availability targets.
- Administered enterprise backup platforms including **Dell Avamar** and **PowerProtect Data Manager (PPDM)**, configuring scheduling, retention policies, and replication for critical data protection.
- Executed infrastructure lifecycle management tasks, including planning and conducting upgrades, migrations, and capacity expansions for storage arrays and backup systems, with detailed testing and rollback procedures.
- Monitored system health, performance, and backup success rates across heterogeneous environments, identifying bottlenecks and implementing **Python**-based automation scripts to optimize storage provisioning and reporting.
- Resolved complex incidents and service requests as Tier 3 support, leading root-cause analyses for storage and backup infrastructure issues and implementing corrective measures.
- Participated in data restoration and recovery tests, and contributed to disaster recovery exercises to validate infrastructure resilience and data protection capabilities, ensuring adherence to defined recovery objectives.
- Developed and maintained **shell scripts** and **Python** tools to automate routine storage and backup operations, improving efficiency and reducing manual intervention for provisioning and monitoring tasks.

SKILLS

Storage Systems – NetApp, Dell PowerStore, Dell ECS, SAN fabrics, Fibre Channel, iSCSI

Backup & Recovery Platforms – Dell Avamar, Dell PowerProtect Data Manager (PPDM), Dell Data Domain, Veeam Backup & Replication

Storage Networking – Cisco Fabric Switches, Brocade Fabric Switches, VSANs, WWPNs, NPIV, Multipathing

Scripting & Automation – Python, Shell Scripting, Ansible

Operating Systems – Linux

Cloud Platforms – AWS (EC2, S3, CloudWatch)

IT Service Management – ITIL

PROJECTS

Enterprise Storage Array Integration and Optimization

- Integrated new **Dell PowerStore** storage arrays into an existing enterprise SAN environment, configuring LUNs and zoning for seamless host connectivity across multiple VMware clusters.
- Developed **Python** scripts to automate the monitoring of storage array performance metrics and available capacity, providing daily reports to infrastructure teams and flagging potential bottlenecks **~2 weeks** in advance of capacity thresholds.
- Performed storage provisioning tasks, creating and managing file shares and block devices for various application teams, ensuring adherence to defined service level agreements and security policies.

Backup and Disaster Recovery Workflow Automation

- Automated the scheduling and retention policy configuration for backups on **Dell Avamar**, reducing manual setup time for new client data sources by approximately **45%**.
- Developed **shell scripts** to parse backup logs from multiple platforms (Avamar, Data Domain), consolidating success/failure status into a single daily summary report for operational review.
- Assisted in validating recovery procedures by performing test restores of critical application data, documenting the process and confirming RTO/RPO compliance for key systems.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
