PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Supported manufacturing process monitoring and troubleshooting for a **biomedicines production** environment, identifying root causes for equipment downtime and implementing corrective actions.
- Developed and maintained **Python scripts** to automate data extraction and reporting for operational performance metrics, reducing manual effort by approximately **15%**.
- Executed **SQL queries** against enterprise databases to validate data integrity and support ad-hoc analytical requests for production workflow analysis.
- Participated in the **commissioning and qualification** of new manufacturing equipment, contributing to validation documentation and testing procedures.
- Investigated and resolved issues reported within the **Manufacturing Department**, collaborating with cross-functional teams including Quality, Engineering, and Maintenance.
- Prepared and updated **Batch Records, Standard Operating Procedures (SOPs), and Work Instructions** to ensure compliance with cGMP and EHS requirements.
- Containerized key data processing components using **Docker**, facilitating consistent deployment across development and production environments on **AWS EC2**.

SKILLS

Manufacturing & Operations – Process Monitoring, Troubleshooting, cGMP, EHS, Batch Records, SOPs, Work Instructions, Commissioning, Qualification, Validation

Programming & Scripting – Python, SQL, Shell Scripting

Cloud & Containerization – AWS (EC2, S3, Lambda, CloudWatch), Docker

Data Analysis & BI – Power BI, Tableau, DAX, Power Query, Statistical Analysis, Data Modelling

Databases – PostgreSQL, MySQL, Oracle

Project Management & Methodologies – Agile, Scrum, Kepner-Tregoe, 6-Sigma

Business Systems – SAP, LIMS, ERP

PROJECTS

Automated Production Reporting System (HCL Technologies)

- Developed a **Python-based ETL pipeline** to extract data from multiple operational databases, transforming and loading it into a centralized data warehouse.
- Built automated scheduled reports using **Python scripting** and SQL, delivering daily summaries of key performance indicators to operations teams, reducing manual report generation time by **20%**.
- Implemented data validation checks within the pipeline to ensure accuracy and consistency of the processed data, supporting improved decision-making for production managers.

Manufacturing Data Visualization Dashboard (MSc Project)

- Designed and implemented an interactive **Power BI dashboard** to visualize manufacturing process performance metrics, including yield rates, cycle times, and equipment status.
- Developed complex **DAX measures** and Power Query transformations to aggregate and model data from various sources, enabling real-time insights for stakeholders.
- Presented the finalized dashboard to business stakeholders, demonstrating enhanced data visibility and facilitating more informed operational adjustments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
