PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Collated, validated, and analysed construction and procurement data from diverse stakeholder inputs for supply chain optimisation, identifying process improvement opportunities for **Procurement** and **Finance** teams.
- Developed and maintained **performance dashboards** in Power BI, translating complex supply chain metrics into actionable insights for key stakeholders and leadership.
- Streamlined data submission processes and resolved discrepancies across core **supply chain** and **ERP systems** by partnering with cross-functional teams, improving data integrity for reporting.
- Supported ad-hoc **digital transformation projects** within the supply chain division, contributing analytical expertise to initiatives focused on system upgrades and process automation.
- Executed advanced **SQL queries** and data manipulation tasks on large datasets to support procurement analysis and extract key performance indicators for strategic decision-making.
- Scripted **Python automation** routines to extract and transform data from disparate sources, reducing manual data collation effort by approximately **15 hours per week** for the analytics team.
- Containerised Java Spring Boot applications using **Docker** and deployed to **AWS EC2** instances, ensuring consistent environments for development and production deployments.

SKILLS

Data Analysis – SQL, DAX, Python, Advanced Excel (Pivot Tables, LOOKUPs), Statistical Analysis, Data Validation, Data Interpretation, Problem-Solving.

BI & Visualization – Power BI, Tableau, Dashboard Development, Data Modelling, Power Query.

Programming & Scripting – Python, Java, Spring Boot, REST APIs.

Systems & Platforms – ERP Systems (SAP exposure), AWS (EC2, S3, Lambda, CloudWatch), Linux, Docker, Git, Jenkins.

Project & Process – Agile Methodologies, Scrum, Change Management, Stakeholder Management, Cross-departmental Collaboration, Report Generation.

PROJECTS

Supply Chain Data Aggregation and Reporting Platform (HCL Technologies)

- Developed a **Python ETL pipeline** to ingest and consolidate procurement data from multiple internal systems and external vendor feeds, standardising formats for analysis.
- Built interactive **Power BI dashboards** to visualise key supply chain metrics, including spend analysis, lead times, and supplier performance, presenting findings to the operations management team.
- Implemented automated data validation checks within the pipeline to ensure data integrity, reducing data discrepancy errors by **20%** before reporting.

Procurement Analytics Dashboard Enhancement (MSc Data Analytics Project)

- Designed and implemented advanced **DAX measures** and data models in **Power BI** to provide deeper insights into procurement spend patterns for a simulated enterprise environment.
- Performed exploratory data analysis using **Python (pandas, NumPy)** and **SQL** on a dataset of over 50,000 procurement records to identify cost-saving opportunities.
- Automated report generation and scheduling through Power BI service, delivering weekly spend analysis summaries to simulated business stakeholders.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
