PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed **Python scripts** to automate data extraction and aggregation from multiple store sources, reducing manual processing time by **~40%** for weekly sales reports.
- Analyzed **historical sales data** and waste metrics using **MS Excel** to inform replenishment decisions, aiming to meet store targets while minimizing product spoilage.
- Collaborated with **field sales teams** daily to discuss store performance, identify sales gaps, and negotiate additional promotional space for flowers and plants.
- Constructed and maintained **individual store profiles**, factoring in weekly trading capacity and performance against targets for flowers and plants.
- Monitored daily sales and waste reports from stores to optimize delivery volumes and extend product shelf life.
- Managed the process of **actioning delists** from stores on high-wasting lines, both daily and weekly, to improve inventory efficiency.
- Implemented **basic containerisation** of Python scripts using Docker for more consistent execution environments across different systems.

SKILLS

Data Analysis & Planning – Forecasting, Sales Planning, Replenishment, Demand Planning, Waste Analysis, Data Interpretation, Store Profiling, Stock Management

Core Tools – MS Excel, Python, SQL, Jira, Confluence, Git

Cloud & Scripting – AWS (EC2, S3, Lambda, CloudWatch), Docker, Shell Scripting

Programming Languages – Python, Java, Spring Boot

Databases – PostgreSQL, MySQL, Oracle

Observability & Support – Splunk, Dynatrace, Incident Response, Change Management

Visualization & BI – Power BI, Tableau, DAX, Power Query

PROJECTS

Automated Sales Reporting System (HCL Technologies)

- Developed a **Python-based ETL pipeline** to extract sales and inventory data from multiple databases (PostgreSQL, Oracle) for a financial-services operations dashboard.
- Automated the generation of weekly summary reports using **Pandas** and scheduled their delivery via email, handling approximately **3,000 sales records** per report.
- Implemented data validation checks within the pipeline to ensure accuracy and consistency of reported figures before they were consumed by downstream systems.

Store Performance Analytics Dashboard (MSc Data Analytics)

- Designed and built an interactive **Power BI dashboard** to visualize key performance indicators for retail store operations, including sales, waste, and stock levels.
- Created complex **DAX measures** to calculate Year-over-Year (YoY) growth, Week-over-Week (WoW) changes, and waste percentages, presenting insights to business stakeholders.
- Utilized **Power Query** to clean and transform data from various sources, ensuring a reliable data model for accurate reporting and analysis.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
