PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Gathered business requirements from global stakeholders for digital platform enhancements, translating them into actionable user stories and technical specifications for the Salesforce development team.
- Managed the end-to-end delivery of digital initiatives, coordinating with cross-functional teams through design, testing, deployment, and post-live support phases.
- Designed and documented configuration changes within the Salesforce landscape, including Sales Cloud and Service Cloud features, ensuring adherence to best practices and change control procedures.
- Supported business data activities, including data mining and analysis, to identify trends and opportunities for process optimisation and platform improvement.
- Developed and maintained trusted business relationships with internal customers by providing clear communication, timely updates, and proactive support throughout project lifecycles.
- Evaluated new Salesforce features and related technologies, assessing their relevance and potential impact on optimizing globally aligned business processes.
- Provided application support for Business As Usual (BAU) activities, troubleshooting issues and ensuring the stability of the customer-facing digital platforms.

SKILLS

Salesforce – Sales Cloud, Service Cloud, Experience Cloud, Configuration, Administration

Business Analysis – Requirements Gathering, Stakeholder Management, Process Optimisation, User Stories, UAT

Project Management – Agile, Scrum, Delivery Methodologies, Deployment, Documentation

Data & Analytics – Data Mining, Analytics, Business Intelligence

Technical Skills – REST APIs, SQL, Java Spring Boot, Python Scripting, AWS, Docker, Linux, Jenkins, Git, Jira, Confluence

PROJECTS

Global Sales Process Digitisation (HCL Technologies)

- Collaborated with business analysts and sales operations teams to map existing sales workflows and identify areas for digitisation within enterprise systems.
- Designed a series of enhancements for an internal CRM platform, focusing on improving lead tracking and sales pipeline visibility for a user base of over 500 sales representatives.
- Developed REST API integrations using Java Spring Boot to connect the CRM with upstream ERP modules, streamlining data flow for order processing and customer data management.

Financial Operations Dashboard Enhancement (HCL Technologies)

- Supported a payments operations dashboard used by a financial services client, focusing on transaction monitoring and alerting for operational issues.
- Wrote Python scripts to automate data validation checks and generate scheduled reports on payment processing metrics, improving data accuracy for the operations team.
- Managed change requests for the dashboard application, coordinating UAT with business stakeholders and ensuring successful post-implementation triage.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS
