PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and developed complex financial models in **Excel** to support business and financial decision-making for enterprise clients, incorporating sensitivity analysis and scenario planning.
- Extracted, processed, and reconciled large datasets using **SQL** and **Python** for analytical reporting, ensuring data integrity and accuracy for model inputs.
- Developed and documented model review strategies, including re-calculation procedures, to validate client models and identify potential risks and inaccuracies.
- Contributed to the development of analytical and reporting solutions, integrating data extraction via **SQL** with processing and reconciliation of large data sets.
- Carried out relevant analysis on business drivers and operational metrics, presenting findings clearly in both written reports and oral presentations to stakeholders.
- Participated in client-facing engagements, managing project tasks and delivering high-quality work within agreed, often tight, timescales.
- Containerized analytical model deployment pipelines using **Docker**, facilitating consistent execution across development and client environments.

SKILLS

Core Modelling – Financial Modelling, Business Modelling, Excel, VBA, Scenario Analysis, Sensitivity Analysis

Data & Analytics – SQL, Python, R, Power BI, Tableau, Alteryx, Data Modelling, Data Management, Data Integration, Data Manipulation

Financial Services – Risk Consulting, Advisory, Corporate Finance, Audit Support, Client-Facing

Development & Operations – Docker, Git, CI/CD

Soft Skills – Commercial Awareness, Problem Solving, Logical Thinking, Attention to Detail, Communication (Written & Oral)

PROJECTS

Financial Model Development for Client Advisory

- Developed a multi-year financial projection model in **Excel** for a client in the retail sector, detailing revenue forecasts, cost structures, and capital expenditure plans.
- Integrated **Python** scripts to automate data ingestion from disparate client sources into the core financial model, reducing manual data preparation time by approximately 40%.
- Documented model assumptions, logic, and validation steps, enabling a clear audit trail for senior management and client review.

Data Analysis and Reporting for Operational Efficiency

- Engineered **SQL** queries to extract and aggregate operational data from a large enterprise database, focusing on transaction volumes and processing times.
- Built interactive **Power BI** dashboards to visualize key performance indicators and identify bottlenecks in operational workflows for a financial services client.
- Performed data reconciliation between source systems and reporting outputs to ensure accuracy and compliance with internal audit requirements.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
