PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained operational dashboards for a financial-services client, monitoring ~4,000 transaction flows daily and flagging exceptions for a support team of 12.
- Automated ETL processes and scheduled reporting using Python scripts, reducing manual data compilation time by 15 hours per week for the enterprise business systems team.
- Executed ad-hoc SQL queries across PostgreSQL and Oracle databases to support data validation and schema change requests for ERP integrations, impacting 3 interconnected systems.
- Designed and implemented REST APIs in Java Spring Boot to facilitate cross-system data exchange, enhancing integration capabilities for core banking applications.
- Containerized Java Spring Boot applications using Docker, streamlining deployment processes and improving consistency across development and production environments.
- Wrote and maintained detailed test plans and QA checklists for new feature releases on the internal growth platform, ensuring comprehensive coverage of new functionality and edge cases.
- Monitored platform performance and agent activity using observability tools, identifying and escalating anomalies to engineering teams to maintain service reliability.

SKILLS

AI/ML – AI-native platform, agent-based systems, prompt engineering, LLM

Testing & QA – QA, testing, regression checks, bug documentation, test plans, QA checklists

Operations – day-to-day operations, approvals, exception queues, monitoring, reliability

Data Analysis – data, dashboards, performance reporting, analytical insights

Programming & Scripting – Python, Java, Spring Boot, SQL, REST APIs

Cloud & DevOps – AWS, Docker, CI/CD, Jenkins, Git

Tools – Jira, Confluence, Splunk, Dynatrace, Mixpanel

PROJECTS

Growth Platform QA and Operations Automation

- Developed automated regression test suites using Python to validate core functionalities of the AI-driven growth platform, reducing manual testing cycles by 40% per release.
- Implemented a system for monitoring agent output against predefined quality checklists, automating the flagging of inconsistent or risky content for operator review.
- Created comprehensive runbooks and documentation for platform operations, enabling faster issue resolution and consistent handling of approval and exception queues for a team of 8 operators.

Financial Operations Dashboard Enhancement

- Engineered Python scripts to parse and enrich transaction data streams, improving the accuracy of real-time monitoring for a payments operations dashboard by approximately 18%.
- Refactored SQL queries for transaction reconciliation workflows, optimizing data retrieval and reducing report generation times from 2 hours to 30 minutes.
- Collaborated with business analysts to define new alerting rules for failed payment messages, enhancing operational visibility and reducing incident response time.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
