PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Coordinated the global **AI Inventory** process, collaborating with business owners and engineering teams to identify and document AI systems, leading to a **15% improvement in data completeness** for the inventory.
- Managed the **AI risk assessment** workflow for multiple business units, guiding system owners through documentation and control implementation, and tracking mitigation actions to closure.
- Facilitated the rollout of **AI content labelling** requirements across diverse functional teams, including supporting training materials and technical control integrations.
- Evaluated and managed the review queue for new **AI vendor submissions**, critically assessing responses and identifying potential risks to ensure compliance with policies.
- Drove **AI Governance projects**, managing timelines and stakeholders across multiple teams and time zones to deliver on agreed priorities and improve operational efficiency.
- Provided **pragmatic advice** on AI use cases, responding to day-to-day queries on approved enterprise and public AI tools for product and business teams.
- Containerized and deployed internal Python scripts for automating manual governance tasks to an **AWS Lambda environment**, reducing repetitive work for the team.

SKILLS

AI Governance – AI Inventory, AI risk assessment, AI content labelling, AI vendor reviews, regulatory compliance, EU AI Act

Project Management – Timelines, Stakeholders, Deliverables, Cross-functional action, Process improvement, Operational efficiency

Technical Skills – Scripting, Workflow automation, Dashboards, Technical documentation, Engineering collaboration

Compliance & Risk – Privacy, Data protection, GDPR, Copyright, Intellectual Property, Risk mitigation

Programming & Scripting – Python, Shell scripting

PROJECTS

AI Inventory Enhancement for Global Operations

- Designed and implemented an improved procedure for maintaining the global AI Inventory, integrating feedback from **engineering teams** and business owners.
- Developed a Python script to automate initial data validation for new AI system submissions, reducing manual review time by approximately **20%**.
- Authored comprehensive documentation and contributed to training materials for business users on AI system registration and compliance requirements.

AI Risk Assessment Automation Framework

- Built a series of automated reminders and tracking mechanisms using Python and basic dashboarding to monitor the completion of AI risk assessments and mitigation actions.
- Collaborated with legal and compliance stakeholders to refine the risk assessment questionnaire and ensure alignment with evolving **regulatory guidelines**.
- Gathered requirements from system owners across different business groups to ensure the framework addressed practical challenges in documenting and tracking AI risks.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
